Balance of recognized deferred tax assets as of 31.12.2015 amounts to 178,767 thousand dinars, of which 144,733 thousand dinars relate to the recognition of the planned amount of use of the transferred tax credit in 2016, on the basis of the adopted rebalanced plan of the Company for the year 2016. The rest of the recognized deferred tax assets as of 31.12.2015 are applied based on the applicable corporate income tax rate of 15% to the balance of retirement provisions, provisions for jubilee benefits, provisions for litigation and to the balance of unpaid public revenues, as the same relate to temporary differences that will be recognized in tax period in which the same are paid.

The balance of recognized deferred tax liabilities as of 31.12.2015 amounts to 267,075 thousand dinars.

After application of the requirements of IAS 12 and offsetting deferred tax assets and deferred tax liabilities as of 31.12.2015, the balance of deferred tax liabilities is stated in the amount of 88,308 thousand dinars (on 31.12.2014, 31,151 thousand dinars).

Effects from changes in deferred tax assets and liabilities in relation to the initial balance, in the amount of 57,157 thousand dinars, were recognized at the expense of deferred period tax expenditures in the amount of 55,814 thousand dinars and at the expense of unrealized actuarial gains in the amount of 1,343 thousand dinars.

Receivables from employees for long-term loans for purchase and tenant purchase of apartments on the day 31.12.2015 amounted to RSD 300,704 thousand (including current maturities in the amount of RSD 15,595 thousand). Effects of adjustment to fair value totaled RSD 170,321 thousand (169,778 thousand for the part of long-term receivables from employees and 543 thousand for the part that relates to the current maturity of long-term receivables). The foregoing relates to loans granted to employees for meeting the housing needs, given for a period of 20 - 40 years. Estimation of the fair value of housing loans as at 31.12.2014, conducted Institute for Economic Research in Belgrade, by projection of future cash flows from collection of receivables for housing loans, using discount rates (built-up method): from 7.5% to 20% depending on whether and in what time intervals housing loans are revalued or are contracted with currency clause, whether they have contracted interest rate or they are contracted without interest rates.

Basic financial instruments of the Company are cash and cash equivalents, accounts receivable, financial investments that arise directly from the Company operation, as well as long-term loans, liabilities to suppliers and other liabilities which main purpose is the financing of the current operations of the company.

## Financial risk management objectives

Financial risks include market risk (foreign exchange and interest rate), credit risk and liquidity risk. Financial risks are reviewed on a timely basis and is preferably avoided by reducing the Company's exposure to these risks. The Company does not use any financial instruments to avoid the impact of financial risk to the business because such instruments are not widely used, and there is no organized market for such instruments in the Republic of Serbia.

#### I MARKET RISK

In its operations, the Company is exposed to financial risks from changes in foreign exchange rates and changes in interest rates. Market risk exposures are examined through sensitivity analysis. There were no significant changes in the Company's exposure to market risk, or the manner in which the Company operates or measure this risk.

## a) Currency risk (foreign exchange risk)

The Company is exposed to foreign currency risk primarily through cash and cash equivalents, short-term financial investments, accounts receivable from buyers, liabilities from long-term loans and liabilities to foreign suppliers.

The Company does not use special financial instruments as protection against risks, considering that in Serbia such instruments are not common.

The stability of the economic environment in which the Company operates, largely depends on the measures of government in the economy, including the establishment of appropriate legal and regulatory framework.

Accounting values of financial assets and liabilities in RSD thousand, disclosed in foreign currency on date of reporting in the Company are the following:

By the analysis of the currency structure of financial assets and liabilities as of 31.12.2015, along with the balance as of 31.12.2014, it can be concluded that financial assets contracted with currency clause are higher than the contracted financial liabilities in foreign currencies. Financial liabilities contracted in foreign currency are generally of long-term nature.

# a) Currency risk (foreign exchange risk) (Cont'd.)

The Company is sensitive mainly to changes in the exchange rate of the euro (EUR) and U.S. Dollar (USD).

The following table presents a sensitivity analysis of the Company to increase and decrease in RSD rate of 10%, in comparison to the foreign currency. The sensitivity analysis includes only outstanding receivables and liabilities in foreign currency and shows their change of 10% at the end of the reporting period in exchange rates. A positive number in the table indicates an increase of the result in the current period when RSD strengthens against the currency in question. In the case of weakening of RSD by 10% compared to the foreign currency, the effect on the current period would be negative.

# b) Risk of interest rate change

The Company is exposed to interest rate risk on assets and liabilities with floating interest rate.

The Company has placed cash and cash equivalents in the group of interest-bearing financial assets with variable interest rates, because it contracted with banks "a vista" interest of variable character, depending on the amount in current accounts and the reference interest rate.

The risk of changes in interest rates on the Company does not represent a significant risk, because the categories of financial instruments that have contractual interest are generally defined with fixed interest

Financial instruments classified by categories of interest and non-interest resources are disclosed in the following summary:

# b) Risk of interest rate change (cont'd.)

#### v) Risk of price change

The Company estimates that there is no risk of price change, because financial instruments of the Company are not subject to price change on the market.

The Company does not operate with securities that are subject to price change in securities market. Furthermore, the Company has no turnover of goods subject to price change. The greatest item in turnover of goods is kerosene which has a transit goods treatment.

#### II CREDIT RISK

The Company estimates that the greatest of the risks affecting financial i nstruments is credit risk, representing the risk that debtors will not be in position to settle their debts in full and in due time, which would result in the financial loss for the Company. The Company's exposure to this risk is limited to the amount of receivables from buyers at the balance sheet date.

The Company performs the reconciliation of assets and liabilities annually, as at 30.11. of the current year or more times during the year for specific clients, if the need arises. The Company has of the total receivables from domestic buyers on 30.11.2015 reconciled 93,47% of receivables. Of 6.53% of unreconciled receivables of domestic buyers on 30.11.2015, to sued buyers refers 4.3%. As for the receivables from foreign buyers on 30.11.2015 the Company has reconciled 96.16% of foreign receivables. Unreconciled receivables mainly relate to receivables for which buyers did not provide answers to the submitted IOS. At the end of the financial year, on 31.12.2015, are reconciled receivables with airlines Air Serbia and Montenegro Airlines.

#### II CREDIT RISK (cont'd.)

The Company has large receivables from domestic and foreign buyers on 31.12.2015 (RSD 1,885,457 thousand), so that the credit risk is constantly there. To reduce this risk, the Company regularly monitors the implementation of the collection, analyzes the value of the collection achieved within the contracted period, collection with exceeded contracated period, the balance and age structure of outstanding receivables as per buyers.

The greater the percentage share of individual buyers in total receivables the higher credit risk, especially if these buyers have unstable liquidity and on that basis, exceeded contracted payment deadline.

Receivables from <u>domestic buyers</u> for goods and services on 31.12.2015 in the amount of RSD <u>1,228,157</u> thousand, accounted for 65.14% of total receivables from buyers for goods and services and mostly relate to receivables from Air Serbia ad, in the amount of RSD 722,881 thousand. Total balance of value adjustment of receivables from domestic buyers was RSD <u>158,890</u> thousand (charged to results of previous years RSD 129,497 th ousand and charged to result of the current year RSD 29,393 thousand), so the net value of receivables from domestic buyers amounts to RSD 1,069,267 thousand.

Receivables from <u>foreign buyers</u> for goods and services amounted to RSD <u>657,300</u> thousand, which makes 34.86% of total receivables for goods and services. Total balance of value adjustment of receivables from foreign buyers is RSD <u>24,628</u> thousand (charged to results of previous years RSD 14,373 thousand and charged to results of the current year RSD 10,255 thousand), so the net value of receivables from foreign buyers amounts to RSD 632,672 thousand.

Undue receivables from domestic and foreign buyers for goods and services on 31.12.2015, amount to RSD 1,459,930 thousand (and on 31.12.2014 amounted to RSD 2,970,250 thousand), of which to receivables value correction of the currect period are put undue receivables of Air Serbia in the amount of RSD 6,868 thousand.

Due receivables from domestic and foreign buyers for goods and services on 31.12.2015, are not older than 60 days, and amount to RSD 178,121 thousand (and on 31.12.2014 they amounted to RSD 449,910 thousand), of which to receivables value correction of the currect period are put receivables from Air Serbia in the amount of RSD 2,494 thousand.

#### II CREDIT RISK (cont'd.)

Due receivables from domestic and foreign buyers for goods and services, on 31.12.2015, older than 60 days, amounted to RSD 247,406 (and on 31.12.2014 they amounted to RSD 357,495 thousand) thousand of which RSD 30,286 thousand were put to value correction of receivables of the current period and charged to results of previous years RSD 143,870 thousand (due corrected receivables from domestic and foreign buyers for goods and services, older than 60 days, on 31.12.2014 amounted to RSD 329,488 thousand).

## III - LIQUIDITY AND CASH FLOW RISK

Liquidity is the ability of the Company to settle its liabilities on the terms of their maturity.

The ultimate responsibility for liquidity risk management is on the management of the company, which has established appropriate management system for short-term, medium-term and long-term financing of the Company as well as liquidity management. By continuous monitoring of planned and actual cash flows, the Company maintains adequate cash reserves, and also maintains adequate maturities of financial assets and liabilities.

The following tables present details of outstanding contractual maturities of financial resources. The amounts shown are based on the undiscounted cash flows arising on the basis of financial resources based on the earliest date on which the Company will be able to collect receivables.

| Maturity of financial assets                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 31.12.2015 | 31.12.2014 |

## Capital risk management

The aim of capital risk management is provision of such a structure of capital that will secure safety in operating, liquidity and solvency, at the same time maximizing profit increase of the owner, through the optimization of debt and equity. In addition to its own capital, which consists of core capital, reserves and undistributed profit, the Company uses the borrowed funds in the form of long-term loans and financial leasing. Free cash flow from current accounts, the Company invests in the form of short-term deposits.

Indicators of indebtedness of the Company as at the end of the observed current period of 2015 and the end of 2014 are as follows:

|    |                                                | 31.12.2015  | 31.12.2014  |

Payment of the part of interim dividend to the shareholder Republic of Serbia, from the account of the Company was made on 11.02.2016. Payment of the remaining amount of the interim dividend to the shareholder Republic of Serbia will be made until 30.06.2016.

In accordance with IAS 10 "Events after the reporting period", we found no existence of other events that may influence or affect the truthfulness and objectivity of the financial statements for the year which ended on 31 December 2015, or would require adjustment of the financial statements.

In Belgrade, 18 April 2016

A.D. Aerodrom Nikola Tesla Beograd

Financial Report for period 1.1. – 31.12.2015

# Convenience Translation of Company's Representation Letter Originally Issued in Serbian

Grant Thornton Revizit d.o.o. Beograd Kneginje Zorke br. 2/4 11000 Beograd Srbija

April 26, 2016

This representation letter is provided in connection with your audit of the financial statements of A.D. Aerodrom Nikola Tesla Beograd (herein after: Company) for the year ended December 31, 2015 for the purpose of expressing an opinion as to whether the financial statements are presented fairly, in all material respects, in accordance with Serbian GAAP.

We confirm, to the best of our knowledge and belief, following facts:

#### Financial Statements

- We have fulfilled our responsibilities, as set out in the Contract for audit of company's financial statements dated July 6, 2015, for the preparation of the financial statements in accordance with Serbian GAAP.
- Significant assumptions used by us in making accounting estimates, including those measured at fair value, are reasonable.
- Related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the requirements of Serbian GAAP.
- All events subsequent to the date of the financial statements and for which adjustments or disclosures are required have been adjusted or disclosed.
- The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole, except for:
  - As disclosed in note 29 to the financial statements, Company's property, plant and equipment as of December 31, 2015 were stated at a revalued amount of RSD 21,529,104 thousand (as of December 31, 2014 at a revalued amount of RSD 21,585,698 thousand), based on the appraisal of these assets as of December 31, 2014 by an independent certified appraiser. Cost replacement method and comparative market approach were used for the appraisal. Based on available documentation and procedures performed, we were unable to satisfy ourselves as to whether aforesaid appraisal methods were adequate for certain categories of property, plant and equipment, or as to the proper documenting of supporting information used in application of certain appraisal methods. Also, Company has not made all necessary disclosures regarding the appraisal of stated assets fair value as required by the IFRS 13 "Fair Value Measurement". Accordingly, it was not possible to estimate the effects that these matters may have on the reported values of property, plant and equipment, revaluation reserves and related deferred tax liabilities as of December 31, 2015, nor the calculated depreciation expense and the result before tax for 2015.

As disclosed in note 35 to the financial statements, Company has presented in comparative information as of December 31, 2014 domestic trade receivables in amount of RSD 3,293,944 thousand (before impairment allowance of RSD 2,617,229 thousand) which include receivables due from the Republic of Serbia Public Debt Directorate in the amount of RSD 2,145,319 thousand (before impairment allowance of RSD 1,897,107 thousand). The aforesaid receivables arose from the assumption of debt owed by Air Serbia d.o.o. Beograd to the Company, pursuant to the Law on Assumption of Liabilities of the Company Air Serbia to Legal Entities and Private Individuals for Services Rendered and Goods Delivered and Conversion Thereof into Public Debt of Republic of Serbia (hereinafter: the "Law"). Although the aforesaid receivables were collected in full as of March 31, 2015, as stipulated by the Law, Company has not applied the provisions of IAS 39 "Financial Instruments: Recognition and Measurement" in relation to impairment, nor the provisions of IAS 10 "Events after the Reporting Period" in relation to adjusting events after the reporting period, i.e. income for stated collection and consequently reversal of impairment was recognized in full in 2015, instead of 2014. Had the Company properly applied aforesaid provisions, trade receivables as of December 31, 2014, and other income and result before tax for 2014 would have been increased by RSD 1,897,107 thousand, and other income and result before tax for 2015 would have been decreased by RSD 1,897,107 thousand. This matter does not impact the balance of Company's net equity as of December 31, 2015.

#### Information Provided

We have provided you with:

- Access to all information of which we are aware that is relevant to the preparation of the financial statements, such as records, documentation, minutes from the meetings of Supervisory Board and Shareholders Assembly and other matters.
- o Additional information that you have requested from us for the purpose of the audit.
- Unrestricted access to persons within the Company from whom you determined it necessary to obtain audit evidence.
- All transactions have been recorded in the accounting records and are reflected in the financial statements.
- Company has fulfilled all its liabilities for which failure to comply might have a materially significant impact on the financial statements.
- We have disclosed to you the results of our assessment of the risk that the financial statements
  may be materially misstated as a result of fraud.
- We have disclosed to you all information in relation to fraud or suspected fraud that we are aware of and that affects the entity and involves:
  - Management;
  - Employees who have significant roles in internal control; or
  - o Others where the fraud could have a material effect on the financial statements.

More specifically, we confirm that we have no knowledge of any such case affecting the Company.

- We have disclosed to you all information in relation to allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others. More specifically, we confirm that we have no knowledge of any such case affecting the Company.
- We have disclosed to you all known instances of non-compliance or suspected non-compliance with laws and regulations whose effects should be considered when preparing financial statements.
- We have disclosed to you the identity of the entity's related parties and all the related party relationships and transactions of which we are aware.
- There will be no cause for and we do not have any plans for liquidation of the Company.

- We have provided all plans for discontinuance of significant part of operations or sale of significant part of the Company.
- No events have occurred subsequent to the end of your audit fieldwork and through the date of your audit report that would have an impact on true and fair view of financial statements.
  - We confirm our view disclosed in Note 2.1. to the financial statements for 2015 which states that the Company has not calculated deferred tax liabilities on account of revalued land, as the Company considers that related provisions of IAS 12 "Income Taxes" cannot be applied in these circumstances due to inability of clear interpretation of the rules regarding the tax treatment of any sale or transfer of rights to use the land, then due to determining the usage rights and ownership rights of Company's land, and due to specific nature of business and regulations applicable to airport operations in Republic of Serbia, as well as specific provisions of Standalone articles of Law on amendments and annexes to the Law on right to free shares and financial compensation realized by the citizens in the privatization process ("Official Gazette of RS" no. 30/2010). Further, assuming that in the case of sale or transfer of rights to use the land this transaction would be subject to capital gains tax and that the purchase value for tax purposes would be determined at the level of purchase value recorded in the books as of December 31, 2003 as determined in accordance with the previously applicable accounting regulations which is a prescribed procedure for real estate owned by legal entities in the Republic of Serbia, in accordance with IAS 12 "Income Taxes" deferred tax liabilities on account of the revalued land as of December 31, 2015 would amount to RSD 1,163,256 thousand, i.e. total liabilities would be increased, and the equity decreased by the same amount. If and when there is a conversion of right to use into the ownership rights for the land referred, deferred tax liabilities will undoubtedly exist and the Company will have to record them and present them in its financial statements.
- We confirm that income tax return with supporting documentation for 2015, as well as restated tax returns with supporting documentation for 2010, 2011, 2012, 2013 and 2014, will not be different from the drafts we provided to you and based on which we recorded and prepared financial statements for 2015.
- We confirm that we understood your responsibility to express an opinion on consistency of annual business report with financial statements, in accordance with Law on Auditing ("Official Gazette of Republic of Serbia" no. 62/2013). We confirm that Company's annual business report for 2015 is consistent in all material matters with Company's financial statements for year ending December 31, 2015.
- We confirm that we understood our responsibility regarding the accounting and financial reporting, as provisioned in the Rulebook on the provision of ground handling services at airports ("Official Gazette of Republic of Serbia" no. 61/2015). We confirm that we understood your responsibility for expressing an opinion whether the accounts of stated activities were separate during 2015, and whether there were any interrelated flows between stated activities, as provisioned in the stated Rulebook. We confirm that accounts of airport operator activities and ground handling activities in the Company have not been separate as of December 31, 2015 and during the year ending on that day.
- We confirm that we understood your responsibility for expressing an opinion on the efficiency of internal audit, risk management system and internal control system of the Company, and for inclusion of your conclusions and findings in Management Letter, as well as to deliver the Management Letter to the Securities Commission (of Republic of Serbia), as stipulated in Law on the Capital Market ("Official Gazette of Republic of Serbia" no. 31/2011 and 112/2015).

We confirm that Company's internal audit have not adopted the plan of internal audit and have not issued any internal audit reports up to this day.

#### 2.1. REVIEW OF CORPORATE GOVERNANCE RULES

AD Aerodrom Nikola Tesla in Belgrade, as a member of the Chamber of Commerce of Serbia adopted the Code of Corporate Governance that was published in the Official Gazette of the Republic of Serbia, No. 99/2012, as well as on the Company's website www.beg.aero.

The rules of this Code are supplement to the current legislation, so that no provision of the Code abolishes the legal rule that governs the same question differently. Also, the Code does not in any way change the meaning, or proper interpretation of the legal provisions. The Code is within the limits of the law, because it covers matters that are not regulated by law (the so-called Legal vacuum), or is regulated by dispositive legal norms.

The Code contains two types of rules:

- 1) Recommendations rules that a for-profit corporation has to accept and act upon them, and which can be recongnized in the Code by the use of the word "should";
- 2) proposals rules that are considered desirable practice in corporate governance, which in the Code can be identified by the use of the words "may," "should," and so on.

The recommendations contained in this Code outline minimum standards for public joint stock companies (members of the Serbian Chamber of Commerce) should accept and act on them, and if they do not do so or do not do so in the manner prescribed by this Code, it is necessary that they provide an explanation for discrepancy done within the statement on implementation of the code of corporate governance in accordance with the Law on companies.

#### 3. AIR TRAFFIC TURNOVER

In the period I-XII 2015 it was achieved total air traffic turnover, as follows:

- 58,507 air movements,
- 4,776,164 passengers and
- 15,681 tons of cargo and mail.

#### 3.1. AIR MOVEMENT TURNOVER

Achieved number of air movements per traffic types in the period I-XII 2015 is shown in the following table.

## Number of air movements per traffic types

| Traffic types                                      | Achiev.<br>I-XII 2014 | III<br>Rebalanced<br>Plan I-XII<br>2015 | Achiev.<br>I-XII 2015 | Index  | Index  | Particip.<br>2014 | Particip.<br>2015 |
|----------------------------------------------------|-----------------------|-----------------------------------------|-----------------------|--------|--------|-------------------|-------------------|
| 1                                                  | 2                     | 3                                       | 4                     | 5(4/2) | 6(4/3) | 7                 | 8                 |
| Domestic air traffic                               | 88                    | 92                                      | 97                    | 110    | 105    | 0.15              | 0.17              |
| International air<br>traffic- domestic<br>carriers | 31,392                | 32,586                                  | 33,117                | 105    | 102    | 53.48             | 56.60             |
| International air<br>traffic-<br>foreign carriers  | 27,215                | 28,394                                  | 25,293                | 93     | 89     | 46.37             | 43.23             |
| TOTAL:                                             | 58,695                | 61,072                                  | 58,507                | 100    | 96     | 100.00            | 100.00            |

The data from the table indicate total physical air traffic volume in the period from I-XII 2015, in the amount of 58,507 which is at the same level compared to the same period 2014 and by 4% lower than number in the III Rebalanced plan for the period I-XII 2015.

Within carrier pattern of the total traffic in for the period I-XII 2015, the largest share in air movements are of the domestic carriers in international air traffic with 56.60%; then there are foreign carriers in international air traffic with 43.23% and at the end, domestic carriers in domestic air traffic with participation of 0.17%.

Realization in the period I - XII 2015 compared to the same period 2014 shows that there is a growth in the share of domestic carriers in international air traffic from 53.48% to 56.60% and decline of foreign carriers in international air traffic from 46.37 % to 43.23%.

**In international air traffic of domestic carriers,** in the period I-XII 2015, was achieved total turnover of 33,117 air movements, which is by 5% higher compared to the same period previous year and by 2% higher in comparison to the III Rebalanced Plan for the period I-XII 2015.

Air Serbia in the period I-XII 2015 has achieved in international air traffic 32,268 air movements which is higher by 8% than in the same period previous year and by 4% in comparison with the III Rebalanced plan for the reporting period.

Air Serbia with 97,44% of share in international air traffic of domestic carriers has a dominant role.

Under other carriers in international air traffic are: Air Pink, Avio Služba, Princ Aviation, Verano Motors and others with realized 849 air movements in the period I-XII 2015 have participated with 2.56% in the total international air traffic of domestic carriers which is by 41% lower compared to achievement in the same period of the previous year and 44% lower in comparison to the III Rebalanced plan for the reporting period.

In the period I-XII 2015 there were 35 foreign air carriers and 1 domestic air carrier, and in the same period 2014 there were 37 foreign air carriers and 1 domestic air carrier.

In international traffic of foreign carriers in the period I-XII 2015 it was achieved 25,293 air movements, which is by 7% lower score in comparison with the same period previous year and by 11% lower compared to III Rebalanced plan for the reported period of 2015.

New foreign carriers which started to operate in the period I-XII 2015 compared to the same period of the previous year are: Swiftair Hellas (Ljubljana, Thessaloniki), Atlas Jet (Antalya, Karsamba, Istanbul, Sabina, Adana, Ankara, Trabzon and Izmir), Bora Jet (Sabina), Niki Luftfahrt (Berlin, Hamburg and Sarajevo), Corendon Airlines (Antalya, Krasnodar and Kristiansand) and Air Baltic (Granada).

Foreign carriers that did not operate in the period I-XII 2015 compared to the same period of the previous year are: Adria Airways, Olympic Air, Cityline Hungary, CSA, Darwin Airlines, Freebird Airlines, Nesma Airlines and Onur Air.

In the period I-XII 2015 the most important role in the pattern of foreign carriers had: Montenegro Airlines with 12.79% participation, Lufthansa with 11.02% and Wizz Air with 10.40%, who collectively achieved 34.21% of international air traffic of foreign air carriers.

With participation from 7.37% to 5.76% in this type of air traffic are: Austrian Airlines, Turkish Airlines, Swiss International and Aeroflot, who together achieved 25.54% in international air traffic of foreign air carriers.

Cargo traffic of express mail in the period I-XII 2015 was carried out by seven foreign air carriers: Cityline Hungary, Swiftair Aviation, Swiftair Hellas, CSA, Raf Avia, Turkish Airlines and Solinair.

Low Cost carriers in the same period are: Wizz Air, Pegasus Airlines, Flaydubai, Norwegian Air, Germanwings, EasyJet, NIki Luftfahrt and Air Baltic.

If individual participation of air carriers in total international air traffic achieved in the period I-XII 2015 (domestic and foreign air carriers) is considered, Air Serbia has a largest participation in it with 55.24%.

#### 3.2. PASSENGER TURNOVER

In the period I-XII 2015 a total passenger turnover of 4,776,164 was achieved, which is by 3% higher than in the same period in 2014 and by 6% lower in comparison with the III Rebalanced plan for the period I-XII 2015.

In domestic air traffic, the turnover is not performed in the period I-XII 2015, or in the same period last year.

In international air traffic of domestic carrier, the turnover in the period I-XII 2015 increased by 32% compared to the turnover for the same period of the previous year and by 23% in relation to III Rebalanced Plan for the same period in 2015. We can note that Air Serbia in 2015 for the first time achieved a turnover of truck transport of cargo and mail (7 tons).

In the foreign carrier's international air traffic turnover of goods in the period I-XII 2015 was 25% higher than the turnover for the same period of the previous year and 28% higher compared to III Rebalanced Plan for the same period in 2015.

#### 4. REVENUES AND EXPENDITURES

The Company performs business activity as single business segment. Accordingly, revenues and expenditures are disclosed at company level.

#### 4.1. REVENUES

In the period I-XII 2015 JSC Belgrade "Nikola Tesla" Airport achieved the total revenue in amount of RSD 10,478,770,312. Thus achieved total revenue is 3% lower in comparison to the achieved revenues in the same period of the previous year and 5% lower in relation to the III Rebalanced plan for the same period 2015.

The pattern of the achieved revenues for I-XII 2015 is shown in the table Revenue pattern by service types.

In the pattern of achieved revenues for the period I-XII 2015 **business revenues** have the greatest participation of 77% in the total revenues amounting to RSD 8,116,138,633. The achieved revenues are 1% lower than the same in the same period of the previous year and 5% in relation to III Revised plan for I-XII 2015.

Within business revenues, revenues generated by providing **air services** (landing, ground handling, lighting, infrastructure, aircraft abode, air-bridges) in the period I-XII 2015 amount to RSD 2,711,540,861 which is 26% of the total revenues. These revenues are higher by 2% compared to the same period last year and by 7% lower in relation to III Rebalanced plan for I-XII 2015.

Revenues from passenger service and security fees were achieved in the amount of RSD 3,534,185,379 for I-XII 2015, which is 34% of the total achieved revenues and are higher as compared with the revenues from passenger service and security fees in the same period of the previous year by 6% and lower by 11% in relation to III Rebalanced plan for the same period 2015.

In the period I-XII 2015 the revenues from **service rendering in cargo-customs warehouse** were achieved in the amount of RSD 150,849,517 and are by 6% higher than revenues achieved on this basis in the same period of the previous year and lower by 1% in relation to III Rebalanced plan for the same period 2015.

In the period I-XII 2015 the revenues from **other services** are 19% higher than in the same period of the previous year and 24% higher in relation to III Rebalanced plan for I-XII 2015, and were achieved in the amount of RSD of 755,702,198. The greatest participation in these revenues refers to: revenues from public services, revenues from the CUTE system, revenues from services on special request, revenues from aircraft de-icing services and revenues from the commercial usage of apron.

The revenues from sales of goods mainly refer to the revenues from the sale of kerosene and in the period I-XII 2015 it was sold 1,484 tons of kerosene (most important buyers are Iran Airlines with participation of 48% and Aeroflot with 29%), while in the same period of the previous year was sold 6,883 tons of kerosene. Realized revenue from the sale of goods for the period I-XII 2015 amounts to RSD 140,434,845 and is lower by 78% in comparison to the same period of 2014 and by 22% higher compared to III Rebalanced plan for the reporting period.

The main reason for decrease of the revenue from kerosene in the period I-XII 2015 compared to the same period previous year is the change in business policy of air carriers that is levitating towards other suppliers, which resulted in a smaller number of customers and thus the smaller quantity of sold kerosene.

In the period I-XII 2015 from the lease of business premises there is achieved revenue of RSD 823,425,833 which is by 9% higher than in the period I-XII 2014, and by 6% higher compared to III Rebalanced plan for the same period 2015. The greatest portion of these revenues refers to renting of business facilities to Dufry Company.

**Financial revenues** (group 66) in the period I-XII 2015 are disclosed in amount of RSD 320,302,751 and are higher by 15% in comparison to the same period of the previous year.

In the pattern of financial revenues for I-XII 2015 the greatest part refers to interest revenues in the amount of RSD 168,452,667, and to realized foreign exchange differences in the amount of RSD 101.111.623.

Other revenues (group 67 and 68) in the period I-XII 2015 were achieved in the amount of RSD 2,042,328,928 and are lower in comparison to the same period of the previous year by 13%.

The reason for such disclosed increase of these revenues is in the period I-XII 2015 receivables are less collected than in 2014, which were in previous years placed on value correction.

The largest part of collected receivables (group 67 and 68) in 2015 refers Air Serbia, which were in previous years placed on value correction of receivables. Public Debt Administration of the Republic of Serbia based on the conversion of the debt from Air Serbia has on 31.03.2015 paid the amount of RSD 1,897,107,221.

The main buyers from the point of participation in sales (group 60+61) in the period I-XII 2015 are:

- Air Serbia with the share in sales revenues of 30.87% (RSD 2,251,424 thousand),
- Deutsch Lufthansa with share in sales revenues of 8.10% (RSD 590,657 thousand),
- Montenegro Airlines with share in sales revenues of 7.12% (RSD 519,415.84 thousand).

| 612010+612310                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | S.No.    | o. Type of service                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                         |                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                    |            |

#### 4.2. EXPENDITURES

In the period I-XII 2015 **total expenditures** were achieved in the amount of RSD 6,524,839,868. Thus achieved expenditures are 7% lower than the expenditures achieved in the same period of the previous year and 20% lower than the figures in the III Rebalanced plan for I-XII 2015.

The purchase value of sold goods (group 50) for the period I-XII 2015 amounts to RSD 133,257,577 and almost completely refers to the purchase value of the sold kerosene. Purchase value of sold kerosene is RSD 97,220,213 or 84% lower than in the same period of the previous year and 8% higher in comparison to the III Rebalanced Plan for I-XII 2015.

As kerosene is registered both on revenues and expenditures, the real revenue of the Company is realised price difference, which amounted for the period I-XII 2015 to RSD 5,877,640. Average participation of price difference in sale value of kerosene (sales margin)for the period I-XII 2015 is 5.70% while in the same period of the previous year it was 4.15%.

The costs of materials and energy (group 51) for the period I-XII 2015 amount to RSD 438,465,269 and participate in total expenditure with 7% and mostly refer to: costs of electrical power, costs of basic material.

Within total expenditures one of the largest amounts refer to the **costs of salaries, reimbursements and other personal expenditures** (group 52), amounting for the period I-XII 2015 RSD 2,414,173,089 which is by 65% higher compared to the same period last year, primarily due to increase of the number of employees. The costs of salaries of employees (gross II account groups 520 and 521) at Belgrade "Nikola Tesla" Airport amount to RSD 1,619,284,757; whereas the costs for persons engaged through Youth organizations amount to RSD 361,236,022 (youth organizations Fan, Beograd, Knez, Medijator and Europa). Group 52 apart from gross II salaries includes also reimbursements by contracts (service contracts), reimbursements per temporary and occasional jobs, reimbursements for the members of the Supervisory board and members of the Assembly of Shareholders and other personal expenditures (transport of employees, business trip wages, costs of trips and joint assistance and jubilee bonuses).

In the **costs of production services** (group 53) which for the period I-XII 2015 amount to RSD 368,161,337, the largest cost refers to **maintenance service costs** in total amount of RSD 155,578,183 and they are by 16% higher than the same costs in the same period of the previous year and by 61% lower compared to III Rebalanced plan for the period I-XII 2015.

Pattern of the costs of production services includes:

- the costs of transport services, where the most part refers to the costs of information and passenger check-in services in the amount of RSD 35,655,747, then the costs of monthly support of ITT for passenger and baggage check-in in the amount of RSD 27,315,797;
- the costs of maintenance services which in its largest part refer to costs of maintenance of other fixed assets in amount of RSD 138,937,198;
- the costs of renting are higher by 10% compared to the same period previous year and mainly refer to costs of renting network and server infrastructure;
- the costs of advertising in the period I-XII 2015 are considerably lower compared to the same period previous year;
- the costs of other services mostly referring to the services of OZB Komerc for Security department, then the costs of water, drainage, and the other.

The costs of amortization and reserving (group 54) for the period I-XII 2015 amounted to RSD 837,325,087, where the cost of amortization amounted to RSD 767,877,635 and of reserving for litigation USD 53,000,000.

Intangible costs (group 55) for the period I-XII 2015 amount to RSD 277,075,934 and they include:

- the costs of non-production services, where the most part refers to the costs of the cleaning services in the amount of RSD 50,808,705.

In addition to costs of non-production services pattern of intangible costs includes also:

- The representation costs
- The costs of insurance premiums
- The costs of payment operations
- The costs of membership fees
- Taxing costs and
- Other intangible costs

**Financial expenditures** (group 56) in period I-XII 2015 are disclosed in the amount of RSD 152,155,153 and are 2% higher than in the same period of the previous year.

In the pattern of financial expenditures, expenditures realized from interest participate with 44%, and amount to RSD 67,482,764 and are 3% higher than in the same period of the previous year. The mentioned expenditures from interest refer to the interests for long-term liabilities per loans (EIB – reconstruction of the Terminal).

In the pattern of financial expenditures, non-realized negative exchange rate differences in the period I-XII 2015 amount to RSD 6,173,124 and they participate with 4% in the pattern of total financial expenditures. Realised negative exchange rate differences in the period I-XII 2015 amount to RSD 78,499,264 and participate with 52% in the pattern of overall financial expenditures.

Other expenditures (group 57, 58 and 59) in period I-XII 2015 were achieved in the amount of RSD 1,904,226,422 and are 13% lower than the same in the same period of the previous year and mainly refer to: expenditures based on direct write-off of receivables (RSD 1,830,396,491-write-off of Air Serbia debt, based on Conclusion of the Government of RS 05 No. 023-13959/2015-1 of 30.12.2015, and the Draft Agreement on discharge of debt), impairment of receivables from major buyers in the country (RSD 29,380,984) — major part refers to Air Serbia (RSD 19,055,531.59), than expenditures of previous years (document received after preparation of financial statements — RSD 13,334,175), impairment of receivables from buyers abroad (RSD 10,041,852), donations for humanitarian, health and religious purposes (RSD 9,853,716) etc.

In the period I-XII 2015 were paid out salaries to employees according to individual employment contracts as well as single payments, as Christmas and Eastern bonuses, to each employee, in the same amount of RSD 9,000.00 net, as well as school supplies for children of employees in the amount: for elementary education RSD 6,000.00 net and for secondary education RSD 8,000.00 net.

In the period I-XII 2015 salaries gross I are increased by 92% compared to salaries gross I in the period I-XII 2014 first of all due to change of employment status of the certain number of persons engaged from OZB Komerc who are transferred and employed by JSC Belgrade Nikola Tesla Beograd, as well as increase of the number of employees.

In the period I-XII 2015 the average gross I salary with Christmas and Easter bonuses and school supplies for the children of employees of the Company amounted to RSD 107,306 and is lower than the same for previous year by 15%. The reason for this decrease is the implementation of the Law on the temporary regulation of the base for calculation and payment of salaries and wages and other regular income with users of public funds, published in the Official Gazette No. 116/2014. Average net salary with bonuses for Christmas and Easter and school supplies for the children of employees of the Company amounted to RSD 76,360.

In disclosing of the business result for 2014 one should bear in mind that there was a write-off of receivables from Air Serbia for the period from 01.10.2014 to 18.09.2015, based on Conclusion of the RS Government 05 No. 023-13959 / 2015-1 dated 30.12.2015 and the Draft Agreement on discharge of debt in the amount of RSD 2,342,273,525.99. Of the said amount is at a position other expenses (account group 576) is the amount of RSD 1,830,396,491, and the amount of RSD 511,877,034.99 was on value corrections in 2014. Write-off of RSD 1,830,396,491 significantly influenced the level of gross and net profit of the Company for the year 2015 compared to the same period last year.

**Net profit** for the period I-XII 2015 amounted to RSD **3,291,026,122**, which is 4% less than in the same period last year.

The Company has implemented a correction of opening balance (01.01.2015) of undistributed profit from previous years for the effects arising by use of the amended Opinion of the Ministry of Finance MF

No.413-00-97/2013-04 of 09.11.2015, according to which the basis for calculation of amortization of real estate purchased before 01.01.2004 was their purchaser value as of 31.12.2003.

Following the Opinion of the Ministry of Finance from 2005, the base for calculation of tax amortization of real estate purchased before 01.01.2004 was their purchaser value, as of 31.12.2003, while according to the new opinion of the Ministry of Finance from 2015, the basis for calculation of tax amortization of real estate purchased before 01.01.2004, is their current (non-written-off) value as of 31.12.2003.

The application of the amended Opinion of the Ministry of Finance MF No.413-00-97/2013-04 of 09.11.2015, had an impact on decrease in net profit of previous years, based on increased income tax liabilities in the amount of RSD 36,106,060 (2010-2014), and on increase of net profit from previous years on the basis of deferred tax liabilities in the amount of RSD 179,458,796, which in offset amount represents an increase of total net profit of previous years in the amount of RDS 144,352,709, of which to increase of net profit of 2014 refers to RSD 4,149,940, so that adjusted net profit for 2014 amounted to RSD 3,422,133,908 (before correction it amounted to RSD 3,417,983,968).

#### SIGNIFICANT BUSINESS OCCURENCES:

#### Chamber 40 m³ for goods with the temperature regime from +15°c to+25°c

- Purpose: Increase of storage capacities in above temperature regime on the basis of demand of business partners, along with raising the quality of service and level of income
- Value: RSD 495,495.00 excluding VAT

Contractor: ART FRIGO doo from Belgrade, the Contract on Public Procurement No. 18/11 of 27.01.2015 for delivery and installation of Chamber

Status: Fixed asset is in function from 20.02.2015. Inventory No. 17122

#### Electronic weighing scale 10 tons

- Purpose: Increase of the capacity of measuring equipment at the export checkpoint customs bond in order to improve handling of the growing volume of export shipments
- Value: RSD 660,000.00 excluding VAT
- Contractor: VAGAR from Novi Sad, Public procurement contract number 18/77 of 30.12.2014 for dismantling of the existing scale, preparatory construction works as well as delivery, installation and certification of the new electronic scale, capacity 10 tons
- Status: The fixed asset is in function from 31.03.2015.

#### Purchase of two aircraft de/anti-icing vehicles

- Purpose: Increase of the capacity and quality of services provided to airlines, i.e. creation of conditions for safer and more regular flow of traffic during periods of poor weather conditions during winter season.
- Value: RSD 129.800.000.00 without VAT
- Supplier: Europlast d.o.o., Public procurement contract number 17-158/2014 of 21.10.2014.
- Status: The vehicles are delivered and in operation from 06.02.2015.

## Installation of additional site for refill of aircraft de/anti-icing fluids

- Purpose: Increase of capacity and more efficient loading and unloading of aircraft de/anti-icing fluid on the ground, i.e. creating of conditions for a more efficient use of vehicles for aircraft de-anti-icing.
- Value: RSD 1,116,319.50 without VAT
- Contractor: Ening-Energetika Inženjering d.o.o., Public Procurement Contract No. 18-69/2014 of 09.12.2014.
- Status: The installation built in and put into operation on 27.03.2015.

#### Procurement of five Push-back tow bars

- Purpose: To increase the capacity and quality of services provided to airlines, and create conditions for safer and more regular traffic at aircraft push-back operations.
- Value: RSD 3,641,236.15 VAT excluded
- Supplier: Aviation Parts Service doo, Public procurement contract No. 17-153/2015 dated 30.09.2015.
- Status: tow bars are delivered and are in operation since 16.11.2015.

#### Purchase of two diesel GPU for supply of aircraft with electricity

- Purpose: To increase the capacity and quality of services provided to airlines, and create conditions for safer and more regular traffic by enabling supply of aircraft with electricity at all parking positions throughout the year.
- Value: RSD 13,449,810.78 without VAT
- Supplier: Europlast d.o.o., Public procurement contract number 17-159/2015 of 02.10.2015
- Status: GPUs are delivered and in operation from 25.11.2015.

#### Purchase of three electric tractors - tow tractors

- Purpose: To increase the capacity and quality of services provided to airlines in the context of transport baggage, cargo and mail for loading and after unloading from the aircraft, thus creating conditions for a more regular flow of traffic.
- Value: RSD 12,338,370.00 without VAT
- Supplier: Centum doo, Public procurement contract No.17-155/2015 of 01.10.2015
- Status: Electric tractors have been delivered and are in operation since 12.16.2015

#### Implementation of information systems for the registration of passengers and baggage (DCS)

- **Purpose**: Rendering high level of service, safety, security and economy both to clients and airport in the domain of passengers and baggage registration, passenger boarding control, cargo loading control and making of aircraft load sheets.
- In the period from 15.06.2015 30.06.2015 was carried out implementation of a new system for the 12 regular airlines with the possibility of its application for additional airlines that express the need.
- The system is also used as a support to other airlines which use company systems (DCS) if they are not operating.
- In the course of implementing the new system, training was organized within the Department of passenger handling for 95 employees, while 10 weight and balance workers were also trained, who make aircraft load sheets.
- Status: The system is in operation and full implementation from July 2015.

#### Start of implementation of automated passengers and baggage reconciliation system - BRS

- Purpose: To raise the level of service, safety, security and cost-effectiveness both to customers and airport in the process of passengers and baggage reconciliation.
- From 24.10.2015 system is in operation and full implementation for the airline Air Serbia.
- With introduction of the system is made reorganization of the technological process of work at the same time with creating conditions for more regular flow of traffic and reduction of costs related to baggage handling.
- In the course of implementing the new system, training was organized for 132 employed in the Ground Handling Department, who directly apply automated system for passengers and baggage reconciliation.

#### Investment "Purchase of roll-up doors"

- Purpose: Public procurement completed, selected the most successful bidder and the contract signed under No. 17-56/2015 with the contractor in the amount of RSD 3,333,000.00. The purchase anticipates replacement of the industrial door on garage of fire brigade and on the facility of mechanization- total of 8 doors. Replacement is done due to obsolescence of doors and because of the need that doors meet certain requirements in speed and thermal insulation that existing doors does not meet.
- Status: Dismantling of old and installation of new doors began at the end of May and is completed by mid-June. All doors were installed, tested and put into operation by 12.06.2015.

#### Investment "Segment doors for baggage make-up areas"

- Purpose: Tender opening was conducted on 13.11.2015. In due course is checking of the accuracy of the bids received, before signing of the contract. The purchase anticipated replacement of industrial doors on departure make-up area T1 as well as on make-up area T2. Replacement is done due to the obsolescence of the doors, poor thermal insulation and poor door system operation which often fails.
- Status: Currently received bids are checked before signing works contract. Signing of the contract is expected by mid-March, while dismantling of old doors and installation of new doors are expected in May 2016

#### Investment purchase of "Bus"

- Purpose: The purchase planned purchase of one bus for transport of passengers on apron, which is equipped also for transportation of handicapped persons. Procurement is carried out after the performed analysis that due to the increased volume of traffic in the daily rush hour, it will be necessary to use six passenger buses simultaneously. Currently ANT owns four passengers buses.
- Status: Public procurement was conducted, selected the most successful bidder and the contract signed under No. 17-117/2015 dated 22.07.2015 with the company "Centar S" in Belgrade, in the amount of EUR 252,900.00. The handover of the bus is done with the Minutes signed on 05.08.2015 at the Nikola Tesla Airport.

  The bus is operation.

# <u>Service of public lighting adaptation and service of design of external luminous sign at Terminal</u>

- Purpose: Public procurement was conducted, selected the most successful bidder and signed contracts under No. 17-47/2015 and 17-48/2015 with the contractor Electrical Energy in the amount of RSD 3,780,000.00 that is RSD 1,995,000.00. The purchase envisaged public lighting adaptation service around the parking lot P2 and making of inscription on the frieze of the roof of terminal 2 towards apron C.
- Status: The service is fully realized at the end of April and the first half of May.

# Investment "Works on the lighting of the central line of the LS from positions B2 to B7 and works on lighting of the central line of the LS positions A10 to A14"

- Purpose: Procurement provides for the modernization of the existing cabinet for remote monitoring and management, the accompanying software, which would give a new factory-installed and tested main control unit of the AMS, equipped with modern components of a new generation of devices with greater capacity, reliability, and advanced functions of control over the operation of the LS equipment.
- Status: Public Purchaser implemented, selected the most favourable Tenderer and signed Contract No. 17-158/2015 with contractor: The group of tenderers made of ELGRAD VISION d.o.o. New Belgrade and MC CORON d.o.o. Leštane. Value is RSD 25,550,000.00.

In the first phase of work a central cabinet of control and management system has been replaced, with supporting software.

In the second phase, delivery and installation of additional equipment is carried out, testing of the complete technical solution in order to achieve full functionality of the system for the operation in special conditions in accordance with the technical specification of the subject procurement.

#### Rehabilitation of concrete gutters on apron C from C1 to C6

- Purpose: Inspecting the existing concrete gutter on apron C from parking positions C1 to C6 was found that the corresponding concrete pipe has burst and that it does not perform its basic function drainage of storm water. It also leads to the breaking off of the concrete parts on the surface of the gutter which represents FOD on the maneuvering areas. It is necessary to replace it in order to ensure adequate drainage, prevent further wash-out of the lower layers and the deterioration of the pavement structure, as well as eliminate the occurrence of FOD zone.
- Status: Execution of works is in progress. Contractor is company GP "Planum" AD. Value of the contract for execution of works is RSD 21,323,971.00. Execution of works is realized in phases. Total execution deadline is 75 days.

# Investment "Works on the lighting of the central line of the LS from positions B2 to B7 and works on lighting of the central line of the LS positions A10 to A14"

- Purpose: Public procurement envisaged construction and electrical installation works according to the main project of LS guidance of aircraft to positions on aprons A and C Phase 2 and Phase 3 of the project, equipping of central lines (TWY, H, junctions K and L; TWG from A10 to A14) with modern LED lights.
- Status: Public procurement implemented, selected the most favourable tenderer and signed contract No. 17-111/2015 with Institute Mihajlo Pupin, IMP Automatika, value RSD 26,107,171.21. Works are completed, acceptance of works carried out on 01.10.2015. Total value of executed works: RSD 25,946,949.79. Issued approval of Civil Aviation Directorate on functional use, system is in regular operation.

# Investment "Adaptation of field lighting system remote monitoring and management of the manufacturer TRANSCON Czech Republic"

- Purpose: Purchase envisages modernization of existing cabinets and accompanying software, which would give new factory assembled and tested the main control unit of AMS system, equipped with modern components of a new generation devices with greater capacity, reliability, and advanced functions of supervision over the operation of LS equipment.
- Status: The public procurement procedure is completed, selected the most favourable tenderer and signed Contract No. 17-158/2015 with contractor: Group of tenderers including ELGRA VISION d.o.o., Novi Beograd and MC CORONA d.o.o. Leštane, value RSD 25,550,000.00.

In the first phase the central cabinet of the monitoring and management system is replaced with accompanying software.

In the second phase is expected delivery and installation of additional equipment as an integral part of the solution for the purpose of full functionality of the system for system operation in special conditions in compliance with technical specification of the subject procurement.

# Agreement reached with JKP Parking servis about return of parking spaces at the position P 1.1

• By coming into force of Annex XI of the Agreement on business cooperation No. 764/2008 of 23.06.2008 (JKP Parking sevris No. 6855 of 23.06.2008), by which space that is in parking position layout kept under designation P1.1 with a total of 102 parking places is exempted from the common exploitation, and made available for use of the JSC Belgrade Nikola Tesla Airport. Parking positions marked in the layout P2, a total of 200 parking places are still subject of regulation of business cooperation in the field of services and use of the parking lot on a unified space with JKP Parking

Servis, in the manner and under conditions defined by the said general Agreement and subsequent Annexes.

• This will achieve appropriate commercial effect from renting of parking spaces for Rent-a-Car companies. Although the basic fee for the lease is reduced from 2,500,000 RSD per month to 1,157,142.86 RSD per month, the difference will be compensated by renting to rent-a-car companies and third parties. Price for renting parking space in part P1.1 for Rent-a-Car companies is 7,000 RSD per month per position, while for other users it is RSD 3,000 per month per position.

In addition to commercial effect, the new parking spaces will be used for renting primarily to Rent-a-Car tenants of office space and thus will significantly relieve the zone of international arrivals and regulate the system of renting vehicles which will raise the quality of service for passengers at Belgrade Nikola Tesla Airport.

#### The company LOT - Polish Airlines has temporarily suspended flights from 01.06.2015

According to previous announcement of Polish Airlines LOT - Polish Airlines has temporarily suspended traffic on the route Warsaw-Belgrade until early 2016, as announced in a press release.

THERE IS A **NEW DCS SYSTEM** IPOrt INTRODUCED THAT HAS PUT OUR AIRPORT IN LINE OF AIRPORTS WITH THE MODERN SYSTEM FOR REGISTRATION OF PASSENGERS AND BAGGAGE. Instead of the previous GAETAN system, after a long time of preparation and introduction procedure came into force on 01.07.2015 the new DCS system IPort.

In this regard, is introduced a new price of 0.55 euros per passenger processed in our DCS system instead of the previous 0.50 euros per passenger processed in our DCS system.

Introduced collection of PRM services (assistance to passengers with reduced mobility) in the amount of 0.22 euros per passenger for all users of service starting from 15.09.2015. Instead of the previous billing of the service of use a wheelchair only when the need occurs is introduced regular collection of PRM service per passenger and in accordance with the Decision of the Shareholders' Assembly of the company Belgrade Nikola Tesla Airport No. 21-21/1 of 23.06.2015.

Introduced collection of BRS service (automation of baggage sorting) starting with 15.09.2015, in the amount of EUR 0.15 per check-in baggage for users of the service of the airline Air Serbia in accordance with the Decision of the Shareholders' Assembly of the company Belgrade Nikola Tesla Airport No. 21-20/1 of 23.06.2015.

# <u>Suspension of the part of charter flights for the summer season 2015 which reduced the planned revenue from airline operations</u>

Due to not issuing permits for the first wave of charter flights for the season S15 there is a decrease of realized flights compared to the previous season S14 which will affect the revenues generated based on airline operations.

JET FUEL PRICE CHANGES THAT LED TO THE REDUCTION OF REVENUES FOR THIS SERVICE Due to the high price of **jet fuel** there has been drain of the part of customers and fall of revenues from the delivery of the same. After signing a contract with a new supplier it is expected to conclude contracts with new clients.

# Conclusion of Annex I of the Lease Agreement with Air Serbia according to the Decision of the Supervisory Board of JSC Belgrade Nikola Tesla Airport - execution of works for investment maintenance of the roof of Terminal 1

• Purpose: Annex I made was based on the letter, which was filed in the archives of the Company under the number 3550 on 19.05.2015 and refers to the request of the tenant Air SERBIA for postponement of payment of the agreed rent until the completion of bringing business premises to the purpose, that is latest by 30.08.2015, as well as the harmonization of positions and statement of the lessee Air SERBIA on its willingness to carry out works for the investment maintenance of the roof above the premise. Main Lease Agreement is concluded on 26.03.2015 under No. 14-15/2015. In connection with the state of the subject business premises total area of 391,91 m2, located in A finger hall and roof surface of the building of Terminal 1 above the office space for repairing, surface 620.00 m2, a meeting was held between of the relevant Departments of JSC Belgrade Nikola Tesla Airport and Minutes was made on 15.05.2015 on the state of office space and a supplement of expert report of the City Bureau of Expertise, which was filed in the archives of the Company under number 4212/3 on 09.06.2015 and is an integral part of Annex I to the Lease Agreement.

# Air Serbia - Recognition of the cost of major maintenance of the roof surfaces of the building of Terminal 1 to the Expert findings and opinion number G-1096/15

Based on the letter from Air Serbia No. 2490 of 28.12.2015 in relation to the requirements for the recognition of costs invested in the maintenance of the roof surfaces of the building of Terminal 1, the Supervisory Board of JSC Belgrade Nikola Tesla Airport at the meeting held on 29.01.2016, passed the Decision No. 33-23/1 approving the reduction of lease fee Joint Stock Company for Air Transportation Air SERBIA Belgrade in the amount of 50% of the monthly fee established on the Lease Agreement No.14-15/2015 of 26.03.2015 up to the amount of resources invested in the maintenance of the roof surfaces of the building of Terminal 1 as per the Expert findings and opinion No. G-1096/15, but without the possibility of recognition of property rights to the premises based on investment of funds.

The value of work actually performed by the expert findings and opinion number G-1096/15 (file number in the archive of Belgrade Nikola Tesla Airport 230 of 13.01.2016) amounts to RSD 5,485,524.00 according to the following reasoning:

JSC Belgrade Nikola Tesla Airport, as lessor, and JSC for Air Transport Air Serbia Belgrade, as lessee, concluded the contract on Lease Agreement of business premises number 14-15/2015 of 26.03.2015. (hereinafter referred to as: Agreement). The agreement, among other things, more closely regulate mutual rights of the parties in connection with the lease and adaptation of office space - the total area of 391.91 m2 located in the A finger hall of Terminal 1 at Belgrade Nikola Tesla Airport.

The parties, thereafter, concluded also Annex 1 to the Agreement on the lease of office space at the Airport Nikola Tesla Belgrade (ANT No. 14-29/2015 of 09.06.2015) (hereinafter: Annex). Article 4 of the Annex provides that the parties subsequently found it necessary to perform works in connection with the repair of the roof surfaces of the building of Terminal 1, and that the lessee will perform investment maintenance of the roof area above the office space. In addition, paragraph 2 of the same article stipulates that the lessee will initially, at his own expense, make the necessary investment maintenance works on the roof, and that the lessor will recognize to the lessee these costs through the reduction of monthly fee, all in the manner and under conditions stipulated by the Decree on conditions for obtaining and alienation of immovable property by direct negotiation, hiring of things in public ownership and the public tendering procedures and collection of written bids ("Official Gazette of RS" No.24/2012). The same article provided that the lessee has the right to reduce the lease fee in the amount of up to 50% of the amount of each monthly fee for a period corresponding to the amount of invested funds (i.e. Actual expenses) incurred by the lessee in connection with the execution of investment maintenance works, based on the request for recognition of the investment maintenance costs.

Article 14, paragraph 1 of Decree on conditions for obtaining and alienation of immovable property by direct negotiation, hiring of things in public ownership and the public tendering procedures and collection of written bids ("Official Gazette of RS" No. 24/2012) provides that the lessor may at the request of the lessee approve execution of works that have the character of investment maintenance on the leased property to the usual standards and regulations in force in the field of civil engineering. Paragraph 2 of the same article stipulates that the report on the current state of real estate with description, bill of quantities and priced bill of quantities of planned works should be developed by a court expert of

appropriate discipline or authorized organization with which the lessor shall conclude a contract on business cooperation, provided that cost of making these documents shall be borne by the lessee.

Paragraph 5 of the said Article stipulates inter alia that after the completion of the works with the consent of the lessor, the lessee is obliged to hand a request to the lessor to recognize the costs of investment maintenance of office space, enclosed to which the invoices are submitted as evidence, provided that the amount of invested funds must be verified by an accredited expert or organization, which will assess the value, quality and standard of executed works and the overall state of real estate in relation to the report on the current situation. Paragraph 6 of the same Article provides that the lessee who with the consent of the lessor in the maintenance of office space invested its own funds, has the right to reduce the lease fee up to 50% of the monthly fee for a period corresponding to the amount of invested funds without the possibility of recognition of property rights to the premises based on investment funds.

Joint Stock Company for Air Transportation Air Serbia Belgrade, as lessee, submitted to JSC Belgrade Nikola Tesla Airport, as lessor, request for recognition of the investment maintaining costs No. 2490 of 28.12.2015 (filing number in the archives of Belgrade Nikola Tesla Airport: 9878 of 30.12.2015) (hereinafter: Request). The Request, inter alia, states that the lessee fully carried out investment maintenance of the roof, and that, therefore, forwards request for recognition of costs related to the execution of investment maintenance of the roof, and reduction of the fee in the amount of 50% of the monthly lease fee to expiration of a period corresponding to the amount of invested funds.

By amendment of the expert report number G-384/15-1-1 of 08.06.2015 (filing number ANT: 4212/3 of 09.06.2015) City Institute for expertise (hereinafter: Report No. G-384/15-1-1 of 08.06.2015), the opinion was submitted on the current state of the part of roof at Terminal 1 of Belgrade Nikola Tesla Airport, with the description, Bill of Quantities and Priced Bill of Quantities of performed works which is an integral part of the Annex. By Report number G-384/15-1-1 of 08.06.2015, the total cost of the works is 5,488,692.00 dinars.

Belgrade Nikola Tesla Airport requested from the City Institute of expertise examination of the works of the part of roof of terminal building above Business Club "Air Serbia". In Findings and opinion of the expert of the City Institute for expertise number G-1096/15 (filing number ANT 230 of 13.01.2016) (hereinafter: Report No.G-1096/15), experts believe that the real estate (part of the roof of terminal building above Business club "Air Serbia") is performed well and according to the rules of civil engineering profession, that performed works on capital maintenance of the roof will provide protection from atmospheric precipitation and impact, fire protection, removal of atmospheric precipitation, release of diffuse steam if there is a risk of condensation, energy-efficient protection and that the lessee in the performance thereof adhered to the approved description, Bill of Quantities, Price Bill of Quantities from the initial report G-384/15-1-1 of 08.06.2015. Value of works by report number G-384/15-1-1 of 08.06.2015 is 5,488,692.00 dinars. The value of works actually performed by report number G-1096/15 is 5,485,524.00 dinars. Accordingly, the value of works actually performed is less than the estimated value of the works mentioned in the Report No G-384/15-1-1 of 08.06.2015.

Bearing in mind that all the requirements are met for the recognition of the cost of investment maintenance and reduction of lease fee provided by the said Decree and Annex, the Supervisory Board of JSC Belgrade Nikola Tesla Airport at the meeting held on 29.01.2016 passed a Decision No. 33-23/1 approving the reduction of the lease fee to Stock Company for Air Transportation Air SERBIA Belgrade in the amount of 50% of the monthly fee established by the Lease Agreement number 14-15/2015 of 26.03.2015 up to the level of resources invested in the maintenance of the roof surface of the building of the Terminal 1.

- Status: Concluded Annex I to the Lease Agreement with the Joint Stock Company for Air Transportation Air SERBIA Belgrade number 14-29/2015 of 09.06.2015 on the basis of previously adopted decision of the Supervisory Board No. 05-193/1 of 29.05.2015.
- Status: Air Serbia has not re-invoiced investment costs with the attached accounts that are proof of the investment (in accordance with Article 14, paragraph 5 of the Decree) in all as stated in the invoice of the contractor and what is recognized by JSC Belgrade Nikola Tesla Airport as per report of the City Institute of Expertise and the Law on VAT with the remark that the value is compensated in accordance with Annex 14-29/2015 of 09.06.2015.
- Reduction of the lease fee will start from the account for January 2016 and will apply to the utilization of funds invested in the maintenance of the roof surfaces of the building of Terminal 1 in accordance with the decision of the Supervisory Board No. 33-23/1 of 29.01.2016 and the Law on VAT. On the invoice is

entered note that 50% of the calculated lease fee is paid by money transfer and 50% is compensated for the works performed.

# Conclusion of the Government of the Republic of Serbia with the proposal Protocol on regulation of mutual rights and obligations between JSC Belgrade Nikola Tesla Airport and the Ministry of Internal Affairs of the Republic of Serbia

- Purpose: On the proposal of the Ministry of Internal Affairs the Government of the Republic of Serbia adopted Conclusion 05 number: 401-6099/2015-1 on 10.07.2015 in relation to the regulation of mutual rights and obligations between the Ministry of Internal Affairs and JSC Belgrade Nikola Tesla Airport. Conclusion recommended to the Supervisory Board of JSC Belgrade Nikola Tesla Airport to exempt direct beneficiary of budget funds, the Ministry of Interior, in the period from 01 January to 31 December 2015 from payment of fixed (common) costs for the use of office space arising from the Lease Agreement 1068/2005 dated 28.12.2005, Annex I No. 763/2006 of 03.10.2006 and Annex II No. 306/2007 of 22.06.2007 on transmission and supply of electricity No. 784/2006 of 16.10.2006 and the Contract on the use of communications systems No 760/2006 of 02.10.2006 and that Airport will continue to use and technically maintain of 11 X-ray devices for passengers and hand baggage security control free of charge according to the Minutes on the handover of x-ray device number 8225 of 20/12/2012, between the Border Police Station of Ministry of Interior of RS and Security Department of Belgrade Nikola Tesla Airport.
- Concluded Protocol on regulation of mutual rights and obligations between JSC Belgrade Nikola Tesla Airport and the Ministry of Interior, number 10-22/2015 of 27.08.2015 in relation to the regulation of mutual rights and obligations relating to exemption from payment of expenses for use of office space and maintenance costs and the use of x-ray devices.
- The Decision of the Supervisory Board is made, No. 05-274/1 of 13.08.2015 in connection with the approval of the text of the Draft Protocol on regulation of mutual rights and obligations. The protocol is applied in the period from 01 January 2015 to 31 December 2015.
- The Decision of the Supervisory Board is made, No. 05-275/1 of 13.08.2015 approving the discount for utility services in the amount of 50% to the Ministry of Interior for the period from 01 January 2015 to 31 December 2015.
- Status: Agreement with the Ministry of Interior Affairs is in progress in connection with the implementation of the Protocol and preparation of materials for the proposal of decision of the Supervisory Board of JSC Belgrade Nikola Tesla Airport.
- Status: Expired Protocol and approved invoice discounts are issued since 01.01.2016 according to contracts.

#### A contract was signed on supply of jet fuel with Company "Dona Export", Ohrid, Macedonia

Concluded a contract with a new supplier for aviation fuel with a Macedonian company "Dona Export",
 Ohrid on 28.07.2015 for 6,500 tons of fuel.

# The cancellation of a service contract for delivery of fuel for requirements of the airlinet company "Aeroflot", concluded with the company "Aerofuels"

• Due to the inappropriate conditions in the supply of jet fuel to Aeroflot there has been a cancellation of the contract with the company "Aerofuels" who for the needs of the Russian airline works as a representative. Cancellation of the contract occurred on 14.09.2015.

#### Commencement of deliveries of jet fuel for the needs of the Iranian airline "Iran Air"

• Delivery of fuel for the needs of "Iran Air" in the form of regular technical landings (three times weekly) started again on 23.09.2015. On average delivered 18 tonnes per flight.

#### The conclusion of Lease Agreement for business premises with Company "Air Serbia"

- Concluded Lease Agreement for offices in the "Red Building" area of 1,339.52 m2, starting from June 2015
- Concluded Lease Agreement for offices in the "Flight Operations Building" area 424,42 m2, starting from August 2015.

The application of the new price list for advertising space 05-310/2 of 09.10.2015

- With the entry into force of the new price list for the lease of advertising space number 05-310/2 dated 09.10.2015, advertising positions are divided into five zones, where prices are expressed in m2. In this way it made it possible to lease all free areas at JSC Belgrade Nikola Tesla Airport. The new price list has increased the number of new advertising positions; prices are also lower compared to the previous price list No. 05-183/3 of 15.12.2014. Adding new positions increased commercial effect of leasing advertising spaces and concluding of lease agreements for advertising space.
- In the period from the entry into force of the new price lists agreement are made have been concluded with several lessees: Easy Advertising, Dva Jelena, Univerzitet Megatrend, which increased proceeds from lease of advertising space. Monthly lease fee with the aforementioned lessees is 3,110.00 euros without VAT.

#### Aircraft de/anti-icing pad

- Purpose: The technical documentation provides construction of an aircraft de/anti-icing pad together with associated installations and facilities. Planned surface of the pad together with service road and parking for vehicles will be about 20,500 m2. Construction of aircraft de/anti-icing pad includes:
  - o the extension of taxiway "F" to taxiway "B"
  - aircraft de/anti-icing pad being performed simultaneously at two positions for aircraft code-letter "C", the maximum wing span 36 m, or in one position for aircraft of wing maximum span 65 m and a waiting position (two position of aircraft code letters "C" for waiting for treatment or one position for aircraft code-letter "E" to wait for treatment).
  - the service road with two lanes in width by 4m, parking for vehicles from which aircraft de/antiicing is done and space for the installation and station (prefabricated container to accommodate people operating vehicles for aircraft de/anti-icing and performing aircraft de/anti-icing treatment).

The purpose of construction aircraft de/anti-icing pad is to reduce the time to take off, as the newly planned pad would be located close to the threshold 12 of the runway, i.e. aircraft anti-icing time is extended (holdover time).

Changing the place of aircraft de/anti-icing operations to newly planned pad enables better management of parking positions on aprons, with a smaller possibility of congestion.

#### · Status:

- Development of technical documentation: after completed public procurement procedure for selection of the most favourable Tenderer for development of technical documentation for construction of aircraft de/anti-icing pad, it was selected consortium with leading member, company Mašinoprojekt kopring. Public procurement contract is concluded on 09.06.2015. Total value of contract amounts to RSD 8,400,000.00. Decision of the Civil Aviation Directorate approving preliminary design is obtained on 16.11.2015. On the meeting of the Review Committee held on 10.12.2015 is approved Feasibility Study with preliminary design.
- Execution of works: On 23.11.2015 is made Decision on initiation of the public procurement for execution of works on aircraft de/anti-icing pad. Tender dossier for public procurement is published on 30.12.2015.

#### Technical documentation for upgrade of finger hall C

- Purpose: The technical documentation will provide for the upgrade of finger hall C, the total area of 11,000 m2 gross. Upgrading of building is planned for the area of the expanded part of apron C, from the parking position C6 to parking position C10. It is anticipated that the new facility's height is GF + 1. Upgrade of finger hall C is of major importance for increasing the terminal capacity. In addition to increase of technological capacities, there will be increase of the area intended for commercial facilities too. Larger commercial offer will lead to increase of the revenue of non-aviation services. Primarily, the idea is that after the construction of this space the same is offered to adequate commercial facilities such as restaurants, duty free and duty paid shops and other facilities that are specifically applicable for this type of space.
- Status: After completed public procurement procedure for the selection of the most favourable tenderer for preparation of technical documentation for upgrading of finger hall C, selected company is Mašinoprojekt kopring. On 29.04.2015 public procurement contract is concluded for development of technical documentation. Total value of Contract is RSD 18,970,000. Approvals for Preliminary Design are obtained from the Civil Aviation Directorate, Ministry of Interior Boarder Police station and Customs Administration. Review Committee approved on 10.12.2015 Feasibility Study and Preliminary Design.

#### Technical documentation for construction of D check point facility

- Purpose: Technical documentation provides for construction of D check point facility of 340 m2. Facility is made in two segments- closed part for X-ray control access and opened for control of vehicles and equipment. Construction of D check point is essential to raise security of the border crossing to an appropriate level and to improve security control of persons and vehicles on the security check point D. By improving operational technologies in check point D, in addition to the above mentioned security aspects, the very movement of persons and vehicles into security restricted area will accelerate and improved. One of the conditions for implementation of One Stop Security concept is improvement of work technology on check-point D, by which adoption the level of service of the Belgrade Nikola Tesla Airport will be in accordance with modern airports in EU and USA.
- Status: Works on the facility D are completed; the certificate of the completion of the expert supervision of works was issued on 14.12.2015. The works were performed by a consortium led by the Morava In with which the Contract was signed on 15.07.2015. The agreed value of the works amounts to 48,400,000 dinars. The works were carried out on a "turnkey" basis.

  On 04.12.2015 was obtained Decision of the Civil Aviation Directorate approving the use of the facility and on 24.12.2015 the positive report of the Commission for technical inspection.

#### Renovation of commercial space

- Purpose: Increasing airport capacity and the commercialization of space in Terminal 1 in order to improve the quality of services and increase revenues from outside the aviation services. The planned new organization of space which involves the formation of offices, meeting rooms, conference operative services, recreation rooms, a kitchen as well as the formation of premises for installation of the UPS. In order to improve the above premises are planned works on the development of suspended ceilings with lighting, forming partition walls, replacement of flooring, renovation of facades and finishing of the area.
- Status: After the public procurement procedure for selection of the best bidder for the execution of the works selected by the consortium headed by the company WD Concord West. The contract was signed on 08.04.2015. Value of executed works is RSD 49,617,507.77. On 06.11.2015 is obtained Decision of the Civil Aviation Directorate approving use of the business space.

#### Renovation the ground floor of Terminal 1 and a connecting part

• Purpose: Expansion of traffic capacity and commercialization of space in Terminal 1 and the connecting part in order to improve quality of service. Arrangement includes the dismantling of existing commercial space on the ground floor of Terminal 1 and the connecting part (counters, travel agencies, shops and restaurants) and a complete renovation and equipping of the space with new, modern, interior design solutions. This position provides also for arranging space for baggage claim area in Terminal 1,

which includes dismantling of equipment for sorting and transfer of baggage, and complete renovation and equipping of the space.

#### · Status:

- o **Development of technical documentation**: Development of technical documentation for renovation of Terminal 1 and the connecting part is completed. After completed public procurement procedure for selection of the most favourable tenderer for development of Preliminary Design and Bill of Quantities, it was chosen company Mašinoprojekt Kopring. On 06.05.2015 was concluded public procurement contract for technical documentation. The total contract value amounts to 780,000 dinars.
- Execution of works: on 15.07.2015 are made Decisions on initiation of public procurement procedures for execution of works on renovation of the connecting part and renovation of the baggage claim area.

#### Reconstruction of existing and construction of new route of heating pipeline

• Purpose: Existing district heating network in the section from canteen to the substation in the building of Terminal 2 is over 25 years old and partially goes under the terminal building. Leaks in this part of the route would jeopardize the stability of the building and rehabilitation alone would be extremely difficult to implement. Modernization of heating pipeline foresees relocation of the route that passes beneath Terminal 1, connecting part and Terminal 2, as well as placing of modern pre-insulated pipes over the entire length of the route, which will lead to a reduction in heat losses in the network, and therefore to financial savings. Also, the new route of the heating pipeline should supply thermal energy also to the terminal building which will be located in the extension of finger hall C.

#### · Status:

- Development of technical documentation: for reconstruction of the existing and construction of the new route of heating pipeline is completed. Technical documentation is bade by company Quiddita with which a public procurement contract is concluded on 28.04.2015 in the amount of 1.939.000 dinars. A positive report of the Review Committee is obtained for Feasibility Study and Preliminary Design in 24.09.2015. On 30.11.2015 a building permit is issued by the Ministry of Construction, Transport and Infrastructure.
- Execution of works: on 23.10.2015 a Decision is made to initiate public procurement procedure for execution of works on reconstruction of the existing and construction of the new route of heating pipeline.

#### Making of Pre-Feasibility Study with General Design

- Purpose: Valid planning documentation, on the basis of which it is possible to plan new facilities, buildings and infrastructure in the area of Nikola Tesla Airport dates back to 1989. Airport Nikola Tesla has already reached and met most of the capacities provided for in that planning documentation, and is disabled to develop further in accordance with the new modern trends in the airline industry, as well as to follow the significant increase in the number of aircraft movements and the number of handled passengers and goods. Preparation of preliminary feasibility study with the general design will enable to start legal procedures for the adoption of new planning documents, which will itself facilitate the development of the airport in several phases over the next 30 years.
  - Status: Pre-Feasibility Study with the General Design has been completed and forwarded to the Review Commission for technical inspection. In accordance with the Law on Air Transport Pre-Feasibility Study with the General Design was forwarded to the Civil Aviation Directorate for their opinion. Elimination of noticed deficiencies is in progress.

### Road that will connect the apron A and apron B

• Purpose: The road that will connect the apron A and apron B is intended for movement of vehicles and equipment for aircraft, handling as well as for movement of official vehicles to technical facilities and heating plant. The new road will allow movement of official vehicles without entering the area which is

under the responsibility of the airport traffic control, i.e. without crossing lines of aircraft movements and movements of official vehicles and equipment for aircraft ground handling.

• Status: On 05.11.2015 are obtained location conditions for construction of the road from the Ministry of Construction, Transport and Infrastructure. After completed public procurement procedure of low value, on 15.12.2015 is concluded contract with Institute for roads. Contracted price of development of technical documentation is RSD 1,440,000. Preliminary Design is completed and on 30.12.2015 handed to the Ministry of Construction, Transport and Infrastructure for expert inspection (revision).

#### Restoration of the murals in Terminal 1

- o Purpose: The existing murals in Terminal 1 are over 30 years old and are in poor condition. Both murals are located indoors, one on the upper floor in a public area, and the other above the main entrance to Terminal 1. The murals were created when the Terminal 1 and have not been restored. The restoration of the mural "Flight of Icarus and Daedalus to the universe" of the artist Milos Bukinca in Terminal 1 began, and the restoration of the mural of artist Zuke Džumhura is in progress. During the later adaptation of the whole Terminal 1 it is planned installation of dedicated light for these murals.
- o Status: On 16.10.2015 a public procurement contract is concluded for the restoration of the mural in Terminal 1 with the Central Institute for Conservation. The total value of the contract amounts to 1,479,218 dinars. The works on restoration of the murals on the upper floor of Terminal 1 are in progress.

#### Preparation of the study analysis of Nikola Tesla Airport capacities

- Purpose: The study should indicate the necessary technological and technical capacities of airport infrastructure, technology of work, and capacity utilization at peak load. To this end, the service provider will carry out comprehensive survey of airport processes and conduct the necessary analysis of the collected data. After the completion of the analysis the service provider will through the study indicate which capacities can be brought into line with the standards using existing resources, which are the weak points of airport processes with suggestions for their improvement, as well as the conclusions regarding the further development of airport capacity.
- Status: On 27.04.2015 a Decision was made to initiate a public procurement.

### Purchase of new seating sets in the Terminal facility

- Purpose: To raise the level of service and comfort of passengers, it was purchased several different types of seating and relaxation sets that meet the highest standards in equipping the airport passenger terminals. By forming separate passenger units for seating and relaxation comfort is increased, and service rendered by airport is raised to a higher level. Sets are intended for the newly created and reconstructed areas.
- Status: In total are purchased 24 individual chairs adjusted for sleeping. Also is purchased semicircular bench with 20 seats, and 36 chairs of different configurations that are located in relaxation areas

Seating sets in waiting areas A1 to A6 and C1 to C4 are replaced with more adequate and more comfortable seats. Distributed are 292 new benches – three-seaters of which each waiting room has benches designed for passengers with reduced mobility, and the chairs also have connectors for charging electronic equipment.

Public procurement contracts have been concluded with the bidders:

o Tehnomerkur (contract value 16,466,000.00 dinars), delivered modular benches for sitting in a three-seater configuration, as well as benches for individual seating intended for equipping of waiting rooms and transit areas.

 Ktitor (contract value 1,237,500.00 dinars), submitted informal sets intended for equipping of relaxation areas, i.e. multi-functional modular elements of the "footstool" type as well as "bench" type for relaxation.

#### Placing of perimeter protection, and integration with video surveillance system

• Purpose: The installation of the radar system for perimeter protection will allow detecting and alarming about unauthorized access of persons and vehicles to airport perimeter. As the perimeter of the Belgrade Nikola Tesla Airport is 14km long, and only a small part of it is illuminated, it is very difficult at night and in poor weather conditions to detect violation of the same. As the very terrain is specific, and there are ups and downs, it is difficult to notice potential intruders when lying down or obscured by some of the facilities. Also, at the outer side of perimeter there are fields in private ownership under agricultural crops, making it difficult to monitor and control the perimeter by security guards. Radar system for perimeter protection is a set of radar sensors that monitor activity in the environment or on critical infrastructural areas such as airports, harbours, military installations, state borders, refineries and other similar facilities of great importance for the country. The system also has cameras and thermal imaging day/night and situational, which makes it easier to locate targets in the area and they are fully integrated into the radar system, and are placed above the radar to see the same thing as radar. Radar is characterized by the ability to detect motion at ground level, such as walking or creeping towards the object or area to be protected, the movement of vehicles and low-flying objects, i.e. the radar's task is to notice, locate, detect and identify the target. For each target the following data are available: size, speed, direction of movement, identification, distance. The system works in all conditions and has filters that allow the removal of the harmful effects of snow and/or rain. These radars usually have a range of action of a few hundred meters to more than 10 km, depending on the needs of users, operate on the principle of Doppler wave and use electronic scanning, which allows simultaneous detection of fast and slow moving targets. The maximum number of targets per scan is several hundred.

Radar systems are characterized by the following features:

- No need for the operator: Radar autonomously detects movement in a particular area, monitors detected targets and raises an alarm if the monitored targets enter into the protected area.
- Coverage: radar covering a larger area can potentially be more useful than the radar covering a smaller area, or limited sector. Most of the radars cover an area within a radius of 360 degrees, while some have their designs limited to a radius of 80 to 180 degrees.
- Resolution/frequency: radars that operate at higher frequencies with narrow beams accurately determine the location of the target.

The radar system will be integrated with video surveillance system. When you attempt to detect unauthorized entry or damage to the perimeter alarm is activated at the Main Security Center, certain cameras are turning to the place of detection and starting to shoot, and security guard patrols are sent to the scene.

- · Value: RSD 82,290,000.00 without VAT
- Contractor: MACCHINA SECURITY doo Belgrade, signed contract No. 17-94/2015 of 18.05.2015.
- Status: works on installation of the system are completed on 30.12.2015 and it is in operation from 31.12.2015.

#### Equipment for recovery of aircraft

• Purpose: The goal of purchasing the equipment is completing existing equipment that was purchased in the previous period, which is used for recovery of disabled aircraft. Based on international regulations ICAO Annex 14, Chapter 9.3 and Airport Services Manual Part 5, the airport must have a plan for the recovery of the aircraft, and the recommendation is to possess also equipment for the recovery of aircraft so that in case of an aircraft accident or incident on runway or manoeuvring areas of the Airport it could make the recovery, move or removal of the same and to restore as soon as possible the normal functioning of the airport.

In case of aircraft accident following the on-site investigation of competent services and upon obtaining permission from them to start moving aircraft or portions thereof, it is necessary as soon as possible to enable the smooth functioning of the airport. In order to achieve this it is necessary that the airport has the equipment and professional staff that can do it safely and in the shortest possible time.

In the previous period is started procurement of a portion of equipment for the recovery of aircraft and the aircraft lifting air bags, synthetic ground panels, elastic cables, steel cables, tension meters and other supporting equipment. The same was necessary to supplement because with existing equipment it is not possible to recover aircraft in all segments of its possible damage. Equipment that is the subject of procurement is required for recovery of small aircraft from the runway (Example: landing of small aircraft that has not pulled out the wheels and stayed on the runway. The lack of adequate and now planned equipment, made removal of the aircraft much harder, although not greatly damaged, because it landed on fuselage and was sliding to a stop without rolling over. During that time it was impossible for any other aircraft to land). Also, with large aircraft if they land on fuselage and have a breakdown on the landing gear, and stop and remain on fuselage, to set the airbags and use equipment which the airport owns, the aircraft must first be temporarily raised by the planned equipment (crossbar for lifting Aircraft and other ancillary equipment). Only then airbags are placed and other equipment to try to recover it and fix the landing gear. If there is no possibility that aircraft moves on its landing gear then part of the equipment that is necessary are also units for transport of aircraft with inoperative / damaged front or main single-axle landing gear with accessories.

It is very important for the airport, since it has only one runway, that in case of accident aircraft, the same is as soon as possible removed because every minute of the airport closure brings huge losses to the airport.

We point out it is important to avoid secondary damage to the aircraft that may be caused if you are not doing it with adequate equipment and if staff handling it is not trained to work with it. Then there will be additional damage to the aircraft for which is directly responsible one who recovers aircraft.

To avoid such situations, it was necessary to obtain adequate and quality equipment and train workers to handle the same.

#### Exploitation of equipment:

In addition to all of the above, the plan of Security Department and Belgrade Nikola Tesla Airport is to try to become a regional centre for recovery of the aircraft and a training centre for the recovery of the aircraft. Bearing in mind that the Belgrade airport is the regional leader in numbers of carried passengers and baggage, as well as the capacity that has in relation to the airports of the former Yugoslavia, with the existing and new equipment for the recovery of aircraft the conditions can be met for conclusion of contracts with airports in the region and airlines, related to provision of aircraft recovery services.

We point out it is in the interest of every airport in case of aircraft accident on the runway to make the runway operational as soon as possible in order not to lose money. Given that very few airlines have equipment that part of the work will very few airport authorities to resolve the situation in a short time, while keeping in mind that hardly any airport in the has any of the equipment to act in such situations, the possibility is that the contracts for providing services of recovery of aircraft, which would be offered to airports in the region, would pay out the equipment itself. Along with the recovery of aircraft in the near future Security Department will be able to provide training in this field as at this time the airport has 12 licensed and trained workers for recovery of aircraft and four of them from are coordinators.

- Value: 17,342,765.00 dinars without VAT
- Supplier: Centum d.o.o., Contract No. 17-85/2015 of 04.05.2015

## Training of employed workers in the field of fire protection

• Purpose: The main objective of the training is to familiarize employees with the field of fire protection and train them in handling extinguishing apparatuses by lecturers and instructors. During 2015 more than 600 employees successfully mastered the training in the field of fire protection. Training is done on the basis of the republic law on fire protection Art.53. Basic training in the field of fire protection is organized for all employees immediately after employment, and not later than 30 days from the date of their employment. Persons working in fire protection activities can perform basic training and practical knowledge test referred to in paragraph 1 of this Article in the legal entity in which they are employed. Basic training in the field of fire protection is organized for all employees, not later than one year from the date of their employment. Employees' basic training and practical knowledge test are performed by legal persons engaged in fire protection activities.

#### Amendment of library "TIP" system

- **Purpose**: Installation of "TIP" system with new images (control system for the x-ray operator, or those who are doing security control of baggage)
- Value: RSD 1.624.000.00 without VAT
- Contractor: JUGOSCAN d.o.o. Belgrade, signed contract No. 18-32/2015 dated 22.04.2015
- Status: The system (image library) is installed in all X-ray devices at the complex of ANT in June 2015. TIP system for hand baggage is intended for devices such as:
  - aTiX
  - HS 6040ix, HS 7555
  - HS 7555si

A library with at least 1,000 virtual displays of dangerous items, sorted by categories of threats, for devices that are used to control cabin baggage must contain:

- 65% of improvised explosive devices.
- 15% of weapons and components,
- 15% knives, and
- 5% other dangerous and prohibited items;

TIP system for checked baggage is intended for device types: HS 100100-2is has 1,000 virtual displays of prohibited items.

TIP system for cargo and mail is intended for devices such as:

- HS 180180-2-2is 300kV
- HS 100100-2is has 1,000 virtual displays of prohibited items.

#### **Explanation:**

Procurement of new images and supplement to the existing image library of TIP system is planned (xrays operator control system, or those who do security control of baggage) and explosive detectors. TIP system consists of images of items (hand, hold baggage ...) in which are hidden prohibited items (weapons, ammunition, explosive devices ...) but so that they cannot be easily noticed. Images of these items are real, or identical to images of real objects that is, baggage being assessed. Images of whole baggage containing the prohibited items are inserted during the work of the operator into devices and downloaded to monitors together with images of actual baggage examined by X-ray device and thus control the work of operators and raise their vigilance and their training. In addition to images of whole baggage system inserts also "prohibited items" into the actual baggage examined on X-ray device. The operator must recognize prohibited baggage or prohibited items in real baggage and only when it is marked as suspicious, if it is a false image of TIP system, on the monitor appears information that it is a test. Based on the number of found or missed "tipped items" then the time required for decision, the system evaluates the work of operator by assessment from -4.66 to +4.66 and on this basis statistic of the work of each operator is made on a daily, weekly and monthly basis, and operators are sent to more or less frequently refreshers or they are for a limited time re-assigned to another job if they have not so good results.

It is necessary to introduce new images each year, to avoid mechanical action of operators when reviewing images that have been previously memorized, once a year is needed to refresh and increase existing image library.

#### STI software with workstations and the central unit

- · Purpose: Install STI software to workstations and the central unit
- · Value: RSD 6,541,875.00 without VAT
- Contractor: JUGOSCAN doo Belgrade, signed contract no. 17-93/2015 on 13.05.2015
- Status: STI software with workstations and the central unit is installed in the room for training operators in T1 of ANT during August 2015

#### Explanation:

STI software is designed for training of x-ray operators. The basis for the procurement is item 5.5.2. of the Airport manual for security screening approved by the Civil Aviation Directorate of the

Republic of Serbia, which stipulates that persons working on x-ray devices or EDS (Explosives Detection System) must complete recurrent training consisting of recognition X-ray images and test, at least once a year. Regulations require that the base has 6000 images of prohibited items and must be updated every year. Operators who do not pass recurrent training cannot further work on these jobs, but are reassigned to a lower position.

The existing system, which was used for training of operators, is owned by the Civil Aviation Directorate of the Republic of Serbia and is given for use by the Airport Nikola Tesla, provided that Civil Aviation Directorate of the Republic of Serbia has priority of use for its own purposes and may, in accordance with their needs, withdraw it from the airport. The system has been at the airport since 2010 and so far Image Base is not restored and the software itself is not entirely appropriate, because it contains both images of hand and hold baggage together and test is designed in such a way that all questions are regarding hand baggage.

The current system does not involve recognition of X-ray images of cargo and mail as separate entirety.

The existing system no longer supports some new legal provisions adopted in the meantime, such as a small knife blade length that can be carried in hand baggage.

As the Civil Aviation Directorate provided that in the x-ray security screening must be operators that work on security screening of cabin baggage, hold baggage, cargo and mail, the new STI system is so designed.

#### X-ray devices for hand baggage standard 2 (2 pieces)

- Purpose: Purchase of two X-ray devices in standard 2 for examination of hand baggage of persons who are not travellers at D security check point.
- Value: RSD 11,316,000.00 without VAT
- Contractor: JUGOSCAN doo Belgrade, signed contract no. 17-97/2015 of 01.06.2015
- Status: two X-ray devices in standard 2 for security screening of hand baggage of persons who are not passengers procured for D security check point, installed in the waiting room gate-C5-C6-C7, as reconstruction of D check point is not completed, and in the aforementioned gate we had devices in standard 1. These devices are used in the above waiting room since the beginning of June 2015.

#### Explanation:

As part of the planned reconstruction of "D" check point it is planned to install place for security screening of employees, requiring deployment of two X-ray devices in standard 2. From the Civil Aviation Directorate it has been suggested before, the last time on 17.04.2014. Decision No. 5/4-04-0017/2014-0002 attached). According to the Manual for security screening in Nikola Tesla Airport is defined that "Persons who are not passengers, together with items carried shall be continuously screened when entering security - restricted area in order to prevent carrying of prohibited items into this area. Security screening of these persons is the same as for passengers and cabin baggage. Due to rationalization of costs, for D check point shall be procured device of more modest performances, which is standard one, which does not have the ability to detect explosives in liquids. This procedure will be done manually with the help of a portable device that has these capabilities, also because of the dimensions of the room where the security screening will be performed, is taken considerably smaller and thus lighter X-ray device. The facility designed for it is not yet constructed, so that X-ray devices will be placed in containers where the space for security screening is smaller than planned.

#### **EMA-3 Liquid explosives detectors (3pieces)**

- Purpose: Purchase of 3 EMA devices to check liquids.
- Value: RSD 9.990.000 excluding VAT
- Contractor: SECURITY COMPANY KOBRA doo Belgrade signed contract No. 17-146/2015 on 22.09.2015
- Status: 3 EMA liquid explosive detectors are installed in the waiting rooms-gates where X-ray devices are installed in standard 1.

### Explanation:

ANT was obliged to provide inspection of liquids, aerosols and gels in all places where security control of passengers and their hand baggage is performed, before boarding an aircraft. As ANT did not have X-

ray devices in standard 2, which can be used for inspection of liquids, aerosols and gels in each waiting rooms-gates (ANT owned 11 X-ray devices in standard 2), for the remaining waiting rooms-gates is made a combination consisting of X-ray devices in standard 1 and EMA for the control of liquids, aerosols and gels (Total of 5 waiting rooms). All this had to be done until inspection by ECAC, which was scheduled for the period 18-24 November 2015. Those devices were delivered and installed in time, i.e. before the said inspection.

#### Test case with pedestal for X-ray device 180180-2 is

- Purpose: Procurement of test case with a pedestal for testing large X-ray machine in Cargo Warehouse.
- · Value: RSD 370,000 without VAT
- Artist: JUGOSCAN doo Belgrade signed a contract- order filed in the archives under No. 6263/1-1 of 09.09.2015
- Status: Test case with pedestal is located in Cargo Warehouse and is used for testing large X-ray machine (180180-2 is).

#### Explanation:

During earlier inspections in Cargo warehouse objection was made that the current test case is inadequate for x-ray device with a 180x180 cm tunnel opening, because the distance of the case from radiation generator is too large to obtain a good image, and therefore with the appropriate test case is also required pedestal onto which the test case is placed when testing x-ray device. This purchase is carried out in time, i.e. before the inspection by ECAC.

#### Implementation of information systems for the registration of passengers and baggage - DCS

• Purpose: The right of use as well as technical support for Information System for registration of passengers and baggage at Belgrade Nikola Tesla Airport.

JSD Belgrade Nikola Tesla Airport according to signed contracts for aircraft, passengers and goods handling is in obligation to provide services of registration of passengers and baggage and making of load sheets for the group of airlines group. Procurement is initiated by the Information Technology Services, and realized in cooperation with employees of Ground Handling Department. The envisaged deadline for the implementation of the system is 8 August 2015. In the period from 09 June to 14 July 2015 for all airlines that use the airport system, was executed a successful migration from the old system DCS *Gaetan* to the new system DCS *iPort*. In progress is also realization of passengers and baggage registration process through Internet, a service that has not been offered until now by Belgrade Nikola Tesla Airport.

During the period of implementation of the system at the same time was carried out training of employees for work on the new system of the Passenger Handling Division and the Technical Handling Division, a total of 104 employees GHD.

• <u>Purpose</u>: The right to use the Information System for the registration of passengers and baggage of group of airlines of *Austrian Airlines*, *Lufthansa*, *SWISS*.

In May 2015, at the request of the airlines *Austrian Airlines, Lufthansa, SWISS*, which for ground handling of aircraft, passengers and baggage use their information system for the registration, migration is performed from the company's system for registration of passengers and baggage from *DCS Picture to DCS Altea*. During the preparation and implementation of the said system, is trained a total of 48 employees of the Passenger Handling Division, Ground Handling Department. The request for migration of the system is sent from the above group of airlines.

#### Expansion of IP telecommunications systems with contact center

• Purpose: The subject of the contract is the purchase and expansion of the telecommunication system and switchboard with new software platforms and user IP phones and equipment, as well as systems integration with other parts of IP telecommunications systems. This acquisition has significantly improved telecommunications system and switchboard by new possibilities and obtained a modern

system of communications. Through this procurement a special system function was implemented that aims to reduce the cost of telephone calls from abroad. A special system option is implemented that translates service of mobile charging from abroad on a local call tariff. The result is significantly reduced phone bills for mobile services.

Value: RSD 11.894.368.83 VAT excluded

· Supplier: Algotech d.o.o.

# <u>Information securing service and maintaining of the continuity of operations of internal services</u> of Nikola Tesla Airport

• Purpose: this project provides information of commercial significance, as well as the smooth operation of the internal services in case of a disaster (rain, floods, electrical shock, etc.). Maintaining operation continuity of internal services is a key part of the business because it is, in variety of natural disasters, necessary to keep all business information and ensure the continuity of internal services. Proper storage of business data and the realization of the smooth functioning of business services precisely represent a form of prevention of data and services protection in case of incidents. By this project Airport secures its information and stores them in a safe place, while the internal services operate continuously.

Value: RSD 14,384,999.96 without VAT

Supplier: EUNET, according to the Contract No. 17-24/2015 of 04.03.2015.

#### The expansion of server and storage systems

• Purpose: This acquisition extended capacity of data storage systems, which have improved the performance and operation of said system. Modern equipment for data storage is purchased, which in conjunction with existing devices make up a unified system for safe and reliably storage and backup of data of the business information systems.

Value: RSD 11,789,200.00 without VAT
Supplier: MDS Information Engineering

#### Expansion of fire alarm systems

• Purpose: This investment represents an extension of fire alarm systems of the facilities of AIRPORT "NIKOLA TESLA" - TERMINAL 1, TERMINAL 2, TS 'RUNWAY' 'CONNECTING TRACT OF TOWER BUILDING AKL TO THE TERMINAL 1, ANNEX OF TERMINAL 1, CONNECTING PART OF TERMINAL 1 - TERMINAL 2, VIP LOUNGE AND TECHNICAL BASE, which provides for replacement of existing automatic fire detection alarms and dismantling of the existing central units and installation of new addressable fire control panels.

It is anticipated networking of the newly exchanges of fire alarm systems with existing fire alarm control panels that are located in the building RCS ground floor and the room KRC into a single infrastructure. Designed addressable system is fully compatible with the existing addressable system that is built into the RCS and finger halls.

It is envisaged to connect fire panels to an existing computer network to connect to the system of early notification service for maintenance by sending an e-mail with a description of the event.

It is designed in a modern interactive addressable system for automatic fire detection which provides clear presentation of pre-alarm and alarm states showing the location of the activated detector.

The result of this investment will be modern and reliable fire alarm system in the building of Nikola Tesla Airport. Fire detection systems of all these facilities will be, in accordance with the new Law on Fire Protection, integrated into a single system, which is an essential element in the safety of the airport complex.

Value: RSD 8,634,262.80 without VAT

· Supplier: Securiton

#### The introduction of wireless Internet access in the complex of ANT

- Purpose: By entering into a contract on hire of network infrastructure wireless Internet access was introduced at the complex of the airport Nikola Tesla. Airport users will be able, until the end of the summer season, to use the service of wireless Internet access free of charge, throughout the airport complex. After that, there will be the possibility to use it free of charge for the first 30 minutes, with the possibility of buying Internet hours. In this way, users of the airport are provided with comfort and constant availability of information from the outside world, business correspondence, e-mails and other benefits.
- · Supplier: Serbia Broadband Serbian cable network

#### VDI infrastructure with external network access

• Purpose: Virtual desktop infrastructure is a technology that offers numerous savings and significantly increases the flexibility and reliability of desktop environments. Virtual desktops can change its capacity and performance depending on the current needs of the user. All virtualized PCs can be quickly restarted on the spare hardware. Routine operations such as installation of a new work place, software upgrade on a large number of work positions and the similar are drastically faster. Increasing capacity on the server side it is possible to arbitrarily increase the capacity of the desktop. Because of the large factor of consolidation it is significantly cheaper than changing the server to improve desktop computers. The most significant advantages of VDI environments are located in the area of environmental management. A virtual machine is easier to backs up and has increased security because the use of USB ports and optical drives on customers can be effectively controlled and thus reduce the possibility that unscrupulous users install unwanted content endangering the security of the entire environment. The result of the benefit of this investment is the possibility that the processor and memory capacity of virtual machines dynamically increase or decrease, depending on the current needs of the user. Thus, users who occasionally require significant resources, do not need to dimension the computers to these maximum requirements, but will receive additional resources only when they are needed.

Value: 11,738,100.00 dinars VAT excluded

· Supplier: MDS Information Engineering

### Upgrading the equipment of central IT resources

• Purpose: This investment represents the purchase and implementation of devices for protection and optimization of IP traffic to the data centre of the airport. Upgrading border protection firewall ASA5510 with new more modern models. It is anticipated that the acquisition includes PoE switches to implement PoE possibilities on locations where IP telephony is implemented. In addition, this acquisition provides for the introduction of new devices for wireless networking with centralized access and flow control that would be part of the data centre. Wireless networking achieves a new dimension of access to IT services and airport services, which would benefit both employees and customers. With the introduction of wireless access it is necessary to introduce new security measures in airports and computer network data centre. Airport data centre represents a central point from which all airport information systems start. Optimal and safe operation of the data centre is of vital importance for security and airport operations as well as for the effective performance of airport operations. Interruption or non-optimal access to airport services information systems would have a negative impact on the efficiency of airport operations and airport business operations.

The result of this investment is the safety and efficiency of data centres and upgrade of computer networks with wireless access to a higher level.

Value: 9,913,544.28 dinars without VAT

Supplier: Saga d.o.o

#### Ramp information and time displays

• Purpose: This investment represents the purchase of ramp information and time displays. Placing of ramp information displays will greatly enhance safety and facilitate the work of employees on the ramp. Installation ramp information displays and their integration into a single system that will significantly reduce both the time necessary to prepare for work in low visibility conditions and excessive communication between services on the ramp also. Ramp information displays enable the provision of timely, fast, accurate and visually interesting information. All ramp information displays will be part of a single system for the notification.

Due to the workload and increased investment, it is necessary to place on new positions time displays informing passengers about the exact time. Currently there is not enough time displays to cover these positions. Time displays with network communication are connected to existing single notification system at the Belgrade Nikola Tesla Airport.

The result of this investment is the process of modernization of IT equipment needed for quality passengers and employees notification. The purchase of this equipment will provide more efficient, more comfortable and better work of employees.

· Value: 7,987,663.00 dinars without VAT

· Supplier: Telegroup d.o.o

#### **Expansion of Security Information Systems**

• Purpose: This investment represents an expansion of the security information systems of Belgrade Nikola Tesla Airport, and expands the computer network access control system and unauthorized access protection system.

Computer-communication network of the airport is a complex system of services, transfers, databases and users. One of the most important parameters of such a complex system is security. In today's world of information technology computer networks protection systems are quickly developed to adapt to new safety standards and requirements of users, so it is essential that the computer network of the airport is renewed with new, modern methods of protection.

Expanding the security information systems improves methods of protection and detection of unauthorized access to computer networks, and the ability to simplify user access to different information systems without compromising the security of computer-communication networks.

The result of this investment understands improvement of existing computer security systems, modernization of their application software caused by significant progress in the field of information technology and the introduction of new advanced systems, which would significantly improve the security of the computer network of airports and reduce the possibility of unauthorized access to critical information systems.

Value: 29,465,319.60 dinars VAT

Supplier: Saga d.o.o

#### The unique access and authentication to information systems

• Purpose: This investment represents a unique access and authentication to information systems of Belgrade Nikola Tesla Airport, and refers to control of access to business - information systems and the protection system against unauthorized access. In today's world of information technology systems for the protection of computer networks and access to business - information systems are rapidly developed in order to adapt to new safety standards and requirements of users, so it is essential that the computer network of the airport is renewed with new, modern methods of protection. The purchase of a system of unique access and authentication to information systems improves the method of protection and detection of unauthorized access to computer networks and business - information system, as well as the ability to simplify user access to different information systems without compromising the security of computer-communication networks.

The result of this investment includes upgrading the security of application software, conditioned by significant progress in the field of information technology, as well as the introduction of new advanced systems, that would significantly enhance the security of computer networks and business - information systems of airports and reduce the possibility of unauthorized access to critical information systems and data

#### Renewal and expansion of MICROSOFT LICENSES (SA - SOFTWARE ASSURANCE)

• Purpose: this procurement provides the right to use as well as technical support for Microsoft products. JSC Airport Nikola Tesla as per previously concluded MS Enterprise Contract No. E5444791 06/2259 dated 28.02.2012, with a validity period up to 28.02.2015, has a permanent right to use licenses; and those versions of the product that were published at the time of termination of this contract, as well as earlier versions.

JSC Airport Nikola Tesla has renewed said contract upon expiry, so that for the software that it covers it provided only SA licenses, i.e. for already existing licenses continued to pay only the technical support - Software Assurance (SA) which practically provides a right to new versions of the software during the newly-contracted period. For all new software products which were not covered by the previous contract, the Purchaser effected procurement of licenses and technical support (LIC/SA). Validity of renewed MS Enterprise contract is from 01.03.2015 to 28.02.2018.

This investment provided for the extension of existing Microsoft licenses at significantly lower prices. As contract was signed for three years during this period licenses can be additionally purchased (Microsoft True-up) for all Microsoft products if business processes so require. As the preferential rates are significantly lower than usual and that due to the expansion of business processes occurs constant need to expand the licenses, by this are made considerable savings. In case existing licenses are not renewed in time the right to a preferential price (SA) is lost, and a new contract is signed with significantly higher prices of licenses.

 Value: RSD 34,390,167.00 without VAT Supplier: E-SMART SYSTEMS, Contract no. 17-40/2015 of 25.03.2015.

#### Information systems for the registration of passengers and baggage - DCS

- Purpose: Information system for the registration of passengers and baggage DCS (Departure Control System) is an information system that is used in the process of registration of passengers and baggage, aircraft boarding control of passengers, cargo loading and making of aircraft load sheets. JSC Belgrade Nikola Tesla Airport has signed a contract for the supply, implementation and maintenance of DCS system. The implementation of the said system is in progress, and in August is foreseen start of system operation. The main role of this information system is to provide a process of aircraft, passengers and goods handling with the aim to provide a high level of service, safety, security and efficiency, both to clients and the airport. This system replaced DCS Gaetan, which is has been used at the airport for more than 10 years, and which termination of operation is announced by the end of July 2015.
- · Value: 228,815.00 Euros without VAT
- Supplier: a group of bidders ASSECO SEE d.o.o. and RES2 BV, Contract no. 17-53/2015 of 15.04.2015.

### Passengers and baggage reconciliation system - BRS

• **Purpose**: Purchaser of passengers and baggage reconciliation system - BRS enables the automation of the passengers and baggage reconciliation process at the Airport Nikola Tesla.

JSC Belgrade Nikola Tesla Airport has signed a contract for the supply, implementation and maintenance of BRS system. The implementation of the said system is in progress, and in August was set the beginning of its operation. The introduction of BRS system enables automation of the important process of work in aircraft, passengers and goods handling of and is one of the next steps in the development of an integrated environment of specific airport systems and provides increased support of information systems to business processes of the Airport. The system should provide a higher level of quality of the process of baggage handling, improving communication paths and providing a common service platform also for the agents involved in the process of passenger and baggage handling.

- Value: 193,890.00 Euros without VAT
- Supplier: a group of bidders ASSECO SEE d.o.o. and TRAVSYS BV, Contract no. 17-89/2015 of 06.05.2015.

#### Bag message service - BMS

- Purpose: The BMS is a service that is essential for the operation of BRS system and which allows its connection to the systems for registration of passengers and baggage (DCS) of airport users.

  JSC Belgrade Nikola Tesla Airport has completed the implementation of this system on 24.06.2015, and the handover protocol was signed on 08.07.2015 after completion of testing for a period of 2 weeks. Bag Message is a service for the distribution of messages designed to provide IATA BAGGAGE INFORMATION MESSAGES both to airlines that need to distribute messages on baggage, and airports that need unified data transmission to their systems for baggage handling, for a number of different users (airlines, airport, etc.).
- Value: BAG MESSAGE SERVICE BMS 112,704.00 euros without VAT
- Supplier: SITA INC BV, Contract no. 17-97/2014 from 29.04.2014.

#### Standard IT equipment - per business plan for 2014

- The purpose: The foreseen procurement will extend the existing server capacity of DATA CENTER to the virtual environment, the implementation of new business information systems, as well as the migration of existing systems to the virtual environment.
- a. BRS (Baggage Reconciliation System) A system for matching passengers and baggage
- b. **Microsoft SharePoint Server 2013** includes the installation and configuration of servers, making internal portal and the development of modules, "Registry Office" and "Public Procurement", which will represent a very demanding services on the new portal.
- c. Microsoft Exchange Server the extension of existing capacity.
- d. **Single Sign On Server** Single Sign On (SSO for short) is an authentication process that allows the user presenting of his accreditation information only once to gain access to all allowed resources. After a user authenticates, he can run applications that he is authorized for.
- e. **ERP** (Enterprise Resource Planning) software that will monitor the entire business of the company with all transactions and organization of the production process.
- f. **Back-up servers** Back-up is a process that refers to making copies of the original source data in case the original source of the data is damaged.
- g. Microsoft Lync communication server
- h. **System Center Configuration Manager** Server that controls computers and servers, updates and maintenance updated version of the application, setup configuration and security policies, monitors state of systems.
- i. As well as other Microsoft services.
- Value: RSD 9,776,600.00 without VAT
- Supplier: PAN COMPUTERS, Contract no. 17-61/2015 of 22.04.2015.

#### **Business Information system - ERP**

• Purpose: Business Information system - ERP (Enterprise Resource Planning System), represents a platform of integrated applications that provide integration and optimization of business processes. The main purpose of ERP system is to facilitate the flow of information between all business functions inside the organization and with external partners and business partners. Future information system should fully integrate business processes, eliminate the manual processes, and introduce automatic control in all fields of application.

The above acquisition includes the purchase of licenses for application software, service of business process analysis, implementation and adaptation of the system to the needs of airport business, as well as service of preventive and corrective maintenance of the system after commissioning. By the purchase of the ERP system is planned replacement of existing business information system with the new ERP system. The new ERP system will in addition to the functionalities of existing business information system introduce new functionalities as IT support to following processes: maintenance of infrastructure, human resources management, advanced reporting, investment management, etc. The purchase of the new system will provide the modular and expandable

solution, that as such, offers a simple system expansion by adding new functionalities and modules in the future:

• Status: On 12.01.2016 was published Invitation to tender. Tender submission deadline is 4. March 2016

#### Equipment and software for upgrading check-in counters

• Purpose: The purchase planned equipping of new premises for the registration of passengers. Supply includes the necessary computer equipment and software to equip the new check-in counters and other facilities that are planned within the new premises, which is being prepared through the project for expansion of airport capacity.

Primarily, it foresees purchase of licenses and equipment for CUTE system which is used as a common technological platform for access to the various DCS (Departure Control System) systems for the registration of passengers. The new check-in counters, as well as those who currently in use at T1 and T2, will be equipped with CUTE equipment which will enable on the new check-in counters too automated passenger registration process through various DCS systems.

In order to use space in which new check-in counters will be placed for the intended purpose, it is intended to purchase an additional number of IDS (Information Display System) monitor with accessories for IDS system for displaying information about flights and timetables as well as various other information for passengers, employees and other users of the airport.

**Status**: The decision on initiation of the public procurement procedure is made as well as Decision on establishing of the procurement committee.

#### The official application of Belgrade Nikola Tesla Airport

- Purpose: Belgrade Nikola Tesla Airport announced the official application for Android and Windows mobile platforms in order to facilitate retrieval of information requested by the passengers, visitors and all users interested in specific information. The mobile application is one of the main sources of information for interested users and it was necessary to create the same so that users get as quickly as possible the information required. At the official application of Nikola Tesla Airport can be followed departures and arrivals, can get information on how to get to the airport, where one can shop, and airport map can be viewed, one can obtain information about airlines, car rental agencies, etc.
- Status: The formal application was released for Android and Windows mobile platforms. The rebalanced procurement plan for 2015 envisaged development of version for IOS mobile platform by which the mobile application for all currently most used platforms will be completed.

#### Technical support services for Microsoft products - Premier Support

**Purpose**: This procurement is carried out providing direct Microsoft Premier Support. The service is completely direct service of Microsoft which provides concrete technical and technological (proactive and reactive), organizational and informational activities.

Microsoft Premier technical support is the highest level of technical support that is available to large Microsoft customers.

As practically the entire server infrastructure is under Microsoft's products and as on that infrastructure are practically all airport information systems, of which some are essential for the basic functioning of the airports, it is of great importance that directly from Microsoft, we have reserved people who are at any time ready to intervene if something happens, faster or slower depending on the level of criticality of the problem and its impact on business processes. In addition, among other things, are provided special workshops and training for employees to be more professionally developed and trained to independently solve even bigger problems than usual, which even more improves response for solving specific problems as well as in the very time for solving arisen problems.

Microsoft Premier is support which Airport as a large company that cares about its image, must have, in order to ensure that a minimal impact on the existing problems to Airport services that it renders. This increases the perception of good and organized operation of the Airport with travellers and visitors.

- · Value: 8.457.480.00 dinars without VAT
- Vendor: Microsoft Software. Contract no. 17-183/2015 of 02.12.2015.

#### Training of employees in the Employees Centre Training

Staff who indirectly affects the safety of air traffic must be trained in a Training Centre authorized by DCA and must have certificates of training (Article 187, Law on Air Transport ("Official Gazette of RS", No.73/2010, 57/2011 and 93/2012). In accordance with the above mentioned Training Centre is authorized by DCA for training of staff performing the following professional tasks in aviation:

- 1. Aircraft, passengers and goods handling at airports;
- 2. Fire & Rescue protection;
- 3. Transport of Dangerous Goods in air traffic;
- 4. Control of correctness of aircraft movement area, airport facilities and installations;
- 5. Supply of aircraft by fuel.

Under staff performing jobs of aircraft, passengers and baggage handling are understood the following job profiles:

- 1. Traffic Coordinator (airport Duty Manager);
- 2. Traffic Dispatcher (traffic dispatcher and Flight coordination);
- 3. Apron dispatcher (ramp agent);
- 4. Controller of aircraft, passengers and baggage handling (supervisor of aircraft, passengers and baggage ground handling, inspector of final checks of aircraft de/anti-icing, stockman in bonded cargo warehouse);
- 5. Aircraft Balancer:
- 6. Airport equipment operator (driver and operator of traction units, passenger stairs, elevators, cargo loaders, water truck tanks, aircraft toilet service units, aircraft de/anti-icing units, air bridges, passengers apron buses, passengers and crew vans etc.);
- 7. Generator operator (operator of the GPU and Air Starter);
- 8. Marshaller (driver of special purpose vehicle Follow me, aircraft ground communications operator);
- 9. The airport host or hostess aviation port (ground stewardesses/stewards, passengers and baggage agents, passengers and baggage registration supervisors).

- 2. Fueller Assistant;
- 3. Stockman (fuel stock-keeper).

Number of trainees in the period 1.1.2015 – 3.12.2015:

ANT

| Stockman | 1  |
|----------|----|
| Fueller  | 17 |

In addition to these trainings prescribed by national legislation the Training Centre performs a large number of **internal trainings** prescribed by internal training programs (in accordance with international ICAO and IATA standards) according to job requirements at the airport and by airlines. It should also be noted that such trainings cannot be obtained in any other existing training centre in our country, while their realization through centres abroad is first of all expensive and of questionable character because of its applicability (trainings are designed to jobs and real working conditions). Internal trainings carried out within the Training Centre of JSC Belgrade Nikola Tesla Airport:

- ✓ The foreman of cargo transhipment
- ✓ The foreman of baggage sorting area
- ✓ Transport worker transhipment of cargo on aircraft / baggage sorting / cargo transhipment in BCW.

#### **Recruitment and Selection**

In the period from 1.1.2015 to 31.12.2015, Human Resources Management Department has conducted 71 selections, during which 346 candidates were invited for an interview.

# Committee obtaining approval for new employment and further engagement with the users of public funds

JSC Belgrade Nikola Tesla Airport records growth in passenger numbers of over 30% in 2014 compared to 2013, and in 2015 trend of growth in passenger numbers continued.

By signing of the Air Transport Agreement between the Government of the Republic of Serbia and the Government of the United States of America (USA), which will allow the establishment of direct overseas flights, the possibility of further expansion of air traffic of the Republic of Serbia is opened.

JSC Belgrade Nikola Tesla Airport, in accordance with the Regulation on the procedure for obtaining approval for new employment and further engagement with the users of public funds ("Official Gazette of RS", No. 113/13, 21/14, 66/14, 118/14 and 22/15) (hereinafter: Regulation), and for reasons of increased workload and improvement of the business, from the that Committee obtaining approval for new employment and further engagement with the users of public funds obtained the approval to increase of the number of employees and engaged persons as follows:

- 1) By conclusion of the Committee approval for new employment and further engagement with the users of public funds 51 No. 112-15916/2014 dated 23 December 2014, JSC Belgrade Nikola Tesla Airport has received approval for employment of 200 employees for a definite period of time;
- 2) Conclusion of the Committee 51 number: 112-1197/2015-2 dated 13 February 2015 approved employment of another 198 employees for a definite period of time;
- 3) The conclusion of the Committee 51 No: 112-3176/2015 of 23 March 2015, approved employment of another 200 employees for a definite period of time;

- 4) Conclusion of the Committee 51 number: 112-3628/2015-1 of 01 April 2015, gave approval for the extension of the validity of approval for persons engaged by Committee's Conclusion 51 Number: 112-15916/2014 dated 23 December 2014;
- 5) Conclusion of the Committee 51 number 112-6977/2015-1 of 30 June 2015 approved for a total of 803 people employed for a definite period of time and 65 persons engaged for professional development and training;
- 6) Conclusion of the Committee 51 number 112-11232/2015 of 19 October 2015 approved employment of 33 persons for an indefinite period of time;
- 7) Conclusion of the Committee 51 number 112-11662/2015 of 3 November 2015, approved employment of another 7 persons for an indefinite period of time;
- 8) Conclusion of the Committee 51 number 112-11662/2015-1 of 3 November 2015, approved a total of 831 persons, of which 802 are employees for a definite period of time and 29 engaged on other grounds (for professional development and training in accordance with the Article 201 of the Labour Law).

Number of employees in JSC Belgrade Nikola Tesla Airport, under a contract of employment for a definite or indefinite period of time as of 31.12.2015, amounts to 1253.

# Professional development and training

In July 2015 was announced public invitation for engagement of candidates for the professional development and training on jobs of traffic, mechanical, electrical, construction and legal profession, the profession in the field of security, passenger handling and computers electronics.

A total of 236 candidates has applied for, whose applications are handled by the Human Resources Management Department. Of the total number of applicants, 34 candidates fulfilled requirements, while with 26 candidates was signed contract on professional development and training.

### 6.1. DESCRIPTION OF ALL SIGNIFICANT OCCURENCES AFTER THE PERIOD I-XII 2015

The Executive Board of the joint stock company Belgrade Nikola Tesla Airport by Decision No. 32-7 of 10.02.2016, approved the payment of interim dividend for 2015 to the shareholder Republic of Serbia, in the amount of 200,000,000.00 dinars. Payment of the part of interim dividend to the shareholder Republic of Serbia, from the account of the company, was executed on 11.02.2016. payment of the remaining amount of the interim dividend to the shareholder Republic of Serbia will be made until 30.06.2016.

#### Purchase of two belt conveyors - electric elevators

- Purpose: increase of the capacity and quality of services provided to airlines in aircraft handling at loading and unloading of baggage, cargo and mail.
- Value: 12,953,032.00 RSD without VAT
- Supplier: Vecar Viljuškari d.o.o., public contract number 17-167/2015 of 20.10.2015.
- Status: elevators have been delivered and are in operation since 17.02.2016.

#### Investment "Construction of fence around the perimeter"

• **Purpose**: continuation of works on the rehabilitation of the existing fence along the perimeter of the airport in order to increase the level of security and alignment of features with the new regulations.

• Status: In progress is implementation of the public procurement procedure for contracting works on construction of a new fence around the perimeter. Expected commencement of works by the end of March 2016.

# Investment "Development of complete technical documentation for the reconstruction of the apron "B" and connection "H"

- Purpose: on the subject apron and connection neither rehabilitation nor reconstruction is made since their construction. In 2010 and 2012 analyzes were performed to determine the state of pavement structures and the following conclusions are made: the state of pavement according to the parameter of damage on apron B and connection H is rated as very bad, and it is necessary to apply emergency rehabilitation reconstruction measures. Procurement includes development of the complete technical documentation of reconstruction of apron B and connection H b and h connectors (TWY H).
- Status: In progress is implementation of the public procurement procedure for contracting development of technical documentation. it is expected to conclude the contract in the second half of April 2016.

#### Investment "Replacement of DG4 with UPS and diesel generator for support"

- Purpose: Existing diesel generator DG4 intended for support to consumers in Terminal 2, is technologically outdated and operates for more than 30 years. It is planned to replace it with UPS device, which functions reliably without the battery pack, and the corresponding diesel generator, which would avoid interruptions in power supply after a network voltage disruption. This would enable the smooth functioning of airport services and reliable power supply in the event of instability of voltage from the network or power surges, and at the same time protect sensitive equipment and consumers.
- Status: Public procurement procedure is in progress.

### **Investment "Calorimeters"**

- Purpose: calorimeters are necessary for accurate accounting of thermal energy to consumers at the complex of ANT (recommended by State Audit Institution).
- Status: Public procurement procedure is in progress. Conclusion of contract is expected in the second half of April 2016.

### Aircraft de/anti-icing pad

**Development of technical documentation**: on 29.01.2016 the Ministry of construction, transportation and infrastructure had issued a building permit for the extension of taxiway F and construction of de/anticing pad, and on 17.02.2016 Serbia and Montenegro Air Traffic Services SMATSA, delivered a positive opinion on the documentation.

**Execution of works**: on 22.02.2016 tender opening procedure was carried out. Tender of the following Tenderers are submtted:

- o Energoprojekt,
- o Planum,
- O Vojvodinaput Pancevo.

#### Construction of the check-pont D facility

Approval of the Sector for emergency management in terms of implemented measures for fire protection is delivered on 21.01.2016. Obtaining of use permit is expected from the Ministry of construction, transportation and infrastructure. The Request for issuing of use permit was submitted on 30.12.2015.

#### Renovation of the Connecting Part of Terminal 1

**Development of technical documentation**: on 18.02.2016 the Decition is obtained from the Civil Aviation Directorate approving documentation: Study - Technology of exploitation of the Connecing Part (excerpt from the preliminary design for renovation of the ground floor hall of Terminal 1 and the Connecting Part).

**Execution of works**: On 21.01.2016 a contract award decision was made for public procurement for execution for works on the renovation of the Connecting Part to group of Tenderers – W.D. Concord West, lonterfast and Dabicom. An appeal was filed by the Tenderer Morava In, to which the reply was forwarded to the Republic Commission for protection of rights in public procurement procedures on 05. 02.2016.

# Reconstruction of the existing heating system and construction of a new route of the heating pipeline

Prepared tender documentation for execution of the works on the reconstruction of the existing heating system and construction of a new route of heating pipeline. The deadline for submission of tenders is 29.02.2016.

#### Road that will connect the apron A and apron B

On 18.02.2016 is obtained Decision from the Civil Aviation Directorate approving the Feasibility Study with Preliminary Design for the construction of roads.

#### Preparation of the study analysis of the Belgrade Nikola Tesla Airport capacity

Prepared tender dossier for preparation of the Study analysis of Belgrade Nikola Tesla Airport capacity. The deadline for submission of tenders is 21.03.2016.

#### Renovation of the Cargo Warehouse

Prepared tender dossier for the execution of works on the renovation of cargo warehouse. The deadline for submission of tenders is 21.03.2016.

#### Purchase of Visual Docking Guidance System

Prepared tender dossier for the purchase of Visual Docking Guidance System. The deadline for submission of tenders is 16.03.2016.

### Procurement of office containers for employees and parking kiosks

• Purpose: Purchase of office containers for employees and parking kosks (a total of 11 containers for requirements of the Director General's Office, Commercial Department and Security Department).

#### **Director General's Office:**

2 containers, one of which consists of two which are connected into one unit, are purchased for Director General's Office, because the ANT in areas where employees are performing regular work activities, directly next to the equipment or device that is used or held for maintenance for the position of head of the service for aircraft parking and transport of passengers and marshaller, there is a need for accomodation of employees, their stay while working in different environments and working conditions. Container for staff is efficient and flexible solution for accomodation of employees and stay in conditions where the nature of work requires the immediate vicinity of the equipment or devices that are used in different locations and environments.

It is essential that the head of the service for parking of aircraft and transportation of passengers is present with service workers. In the container will be located also marshallers who do not currently have the space of their own, but stay in the container for passengers transportation drivers. The most economical solution is to take a double container.

#### **Commercial Department:**

2 containers are bought for commercial purpose, intended for leasing and would be located in security restricted areas, or on apron, for the lack of space for airlines, technical base of airlines for aircraft maintenance or registered legal entities with CAD for aircraft ground handling.

In accordance with the applicable price list of office space leasing number 05-32/2 of 26.02.2014 we have only a price of leasing space for placement of containers on apron in the amount of 13.00 euros per square meter, because until now we did not have the lease of containers, which would by price policy for 2016 be introduced as a new category in the price list for lease of office space with proposed price of 20.00 euros per square meter, thus depending on the surface of the container, the amount of investment by leasing would pay back in the period up to 24 months, taking into account the longer life of containers.

1 container - parking kiosk is purchased for the purpose of organizing the work of parking P7 (parking lot across the street of cargo warehouse, previously designated P3). The existing temporary facility does not meet the needs of work and working conditions of employees, because of age, it is leaking. Opening hours of the parking lot is 00.00 to 24.00 hours.

#### **Security Department:**

4 containers are being bought for Security Department. Two containers are purchased for the purpose of accommodation of security guards. One container will replace the existing sub-standard container in the workplace of security guards at the ramp for access of vehicles to terminal for international arrivals, while the second container (two merged into one) will be placed on the security check-point "E" and it will contain equipment for x-ray screening (x-ray machine and walk through metal detector). This double container will be used by workers of security guards and x-ray screeing.

The remaining two containers will be merged into one double, and are needed for providing adequate space for stay of employees and temporary disposal of equipment during training on fire training ground for preparation of exercises. In the vicinity of the training ground for preparation of exercises there is no brick building, or it is possible to get permission for the same.

Value: RSD 6,600,000.00 without VAT

Contractor: /

Status: Review of the tender dossier before publishment by public procurement officers is in progress.

#### Handheld thermal imager

• Purpose: Purchase of four hand thermal imaging cameras. Three cameras are planned for the sector of security guards in order to increase the level of security of the critical parts of security restricted areas. Thermal imaging cameras will be used in conditions of low visibility and night conditions, as thermal imaging cameras give a clear picture of the terrain and easily recognize emitters of heat, which would enable insight of persons and wildlife that can be a potential danger to critical parts of security restricted

areas. This is especially important during patrol operations in the periods when right next to the perimeter fence at the farms along the fence there are sown crops, which by their density and height prevent clear insight into the field right next to the perimeter fence (period from April to late October). The cameras have the option of storing the recorded material on the memory card for subsequent analysis and creation of a database. Cameras would be used by trained security guards in regular patrols and in interventions. The fourth camera is provided for the fire and rescue service and is the necessary equipment for detection of fire hot spots, finding injured persons on the intervention spot at low visibility and in completely invisibility due to the smoke, darkness, vapors and similar. The camera must be resistant to high temperatures and high humidity that may be created due to firefighting.

- Value: RSD 6,100,000.00 without VAT
- Contractor: /
- Status: Review of the tender dossier before publishment by public procurement officers is in progress.

#### Servicing of LORROS and SeROS camera system

- Purpose: Preparation for operation and maintenance of the Loros and Seros camera system. Seros and Loros long-range camera system (thermal imaging, with the ability to scan the perimeter and laser distance measurement) for some time do not work, and are over more than necessary. Two Seros cameras are mounted on the roof of the terminal, above waiting rooms A1 and A7 and are intended to control the perimeter and part directly in front of the terminal in the public area, while Loros is located on the dome of the tower and has a range of 5 km and serves to control the access roads to the airport and airport wider environment.
- Value: RSD 12,500,000.00 excluding VAT
- Contractor: /
- · Status: Tender Dossier is being prepared.

X-ray security screening sector has planned the following purchases for which proceedings were at the end of 2015:

#### - Explosive traces detector, 18 pieces

ANT has an obligation to use explosive trace detectors at points of passenger and hand baggage security x-ray screening in waiting rooms - gates.

#### - Cabins for gates, 12 pieces

ANT does not have cabs for examination of passengers in all gates, or has one cabin for double gates.

#### - Bins for gates

ANT is required in every waiting room-gate to has a bin for disposal of prohibited items that are confiscated from the passengers. The bin has to be locked.

#### - Explosive inhibiting container

The container must have a form of a trash can, and in principle is used for this purpose, but it has reinforced walls and opening up, so that in case of any explosion, fragmentation effect is pointing upward.

#### - Protection against ionizing radiation training course

X-ray security screening sector, while performing basic activities of x-ray schreening use x-ray devices emitting ionizing radiation.

To obtain a license to conduct such activities for the airport "Nikola Tesla", it is necessary among other things to meet the following criteria:

It is necessary to submit to Serbian radiation protection and nuclear safety agency a certificate of competency to work with sources of ionizing radiation and implement measures for protection against ionizing radiation for all operators.

X-ray security screening sector trained in the past a number of operators, but there are about another 80 operators to be trained.

#### - Walk Thourh Metal Detectors, 4 pieces

X-ray security screening sector needs walk through metal detectors in standard 2, for the new security check points.

#### - Measurement of ambient dose of ionizing radiation

Security Department - X-ray security screening sector has a legal obligation when purchasing new x-ray devices or explosive trace detectors to perform legally prescribed radiation measurement of devices with ionizing radiation and develop radiation safety and security project. The same procedure of measurement of ambient dose equivalent and development, i.e., correction of the project of radiation safety and security measures is foreseen also for the existing devices which license for use expires. X-ray security screening sector in the forthcoming period needs to obtain, or renew a license for a total of 40 x-ray devices and explosive detectors.

### - Network to connect x-ray devices

The existing network was installed in 2010, when into the unique network are connected x-ray apparatuses of the airport operator and border police station. In the meantime, there have been changes that are reflected in the fact that x-ray screeing in gates is taken over by security x-ray screeing sector of Security Department so that it became unnecessary that part of the network with a central unit is located in the technical room of BPS and one workstation to control the work of police officers in BPS premises. Another reason for that purchase is quite destroyed the existing installation by works on the reconstruction of the gates in the past. This year in cooperation with the activities of I.T.T. it is partially renovated so that now it operates in combination with ANT network, but does not cover all the x-ray devices. In order that all the x-ray devices in ANT are networked, it is necessary to make the new network, which would connect all the x-ray devices and thus protect all the security information and control of the work of operators will be available at any time of their engagement at all workplaces where examinations of the security screening is performed.

#### - Trainings

Security Department required training for operators of x-ray security screening sector and security guards sector such as:

Lot 1: training and refresher training for persons carrying out security screening of cabin baggage, hold baggage, cargo and mail.

Lot 2: training and refresher training for persons conducting security screening of passengers, persons who are not passengers and goods they carry.

Lot 3: training and refresher training for security screening and control of access of persons who are not passengers and vehicles they are driving.

Lot 4: training on the importance of security screening in aviation.

### - X-ray devices for screeing of hand luggage and transfer cargo and mail

X-ray security screening sector for screeing in waiting rooms - gates currently uses also x-ray devices in standard 1, which are borrowed from BPS. Procurement is initialed for 7 x-ray devices in standard 2, so that when procurement is completed in the first half of 2016, x-ray devices in standard 1 will no more be used in the waiting rooms – gates.

Also is initialed procurement of x-ray devices in standard 2, for screeing of goods and mail.

#### - Upgrade of existing explosives detectors ION SCAN 500DT, 2 pieces

X-ray security screening sector started public procurement for upgrade of existing explosives detectors ION SCAN 500DT, produced in 2011, which are no longer in the list of ECAC-reference devices, but after software upgrades tehy will again be on the above mentioned list.

#### - Status RA3

It is necessary for JSC Belgrade Nikola Tesla Airport to gain status RA3 third country Regulated Agent. this status is only recognized by the European Union, i.e. foreign airlines - air carriers from EU. The approval of this status is given by validators of security from the list of the European Union, after the inspection of security measures implemented by the Belgrade Nikola Tesla Airport for treatment of goods and mail consignments. Requirements of all the airlines' inspections so far were that Airport is given that status as it will then be recognized (and placed on the list of EU for RA3) as the airport implementing cargo and mail security measures in line with EU standards. status is issued for a period of 5 years.

#### Implementation of the new CUPPS software platform

- Purpose: Belgrade Nikola Tesla Airport with companies Asseco SEE and Travsys BV in October 2015 started the project of implementation of new CUPPS (Common Use Passenger Processing System) and CUSS (Common Use Self Service) platform that will replace the existing SITA CUTE (Common Use Terminal Equipment) and CUSS platform. CUPPS and CUSS is a technological platform that provides terminal access to various information systems, airlines, and systems for the registration of passengers to control the boarding of passengers and baggage, as well as to control the load of the aircraft whose use is essential in the process of ground handling. The platform also allows self-registration for the flight via cuss kiosks at the 2 kiosks that are currently installed in terminal 2. That platform enables users of airport services (airlines) to use on it their own systems for aircraft, passengers and goods handling, and also allows planning and rationalization of airport resources (check in counters, gates, transfer counter, etc.).
- Status: implementation of the platform is in its final stage and is expected to be completed by the end of February. Currently, at the airport the new CUPPS and CUSS platform is used on 80 of the 92 existing positions. Period of stabilization of the system is inprogress, after which the system will be handed over for use.

#### Standard IT equipment - according to the plan for 2015

- Purpose: By planned procurement is contined the process of modernization of IT equipment in use, which started by procurements from previous years. The purchase of above equipment provides more efficient, more comfortable and better work of employees. Obsolete and worn out equipment will be out of use which enables to maintain the level of quality and reliability of equipment. Also, as a result of expansion of the airport the procurement of equipment covers new positions for which the need occur and serving of all the extended and new business processes in everyday business is made possible. The new equipment adequately provides IT support in automation and handling all the processes that are taking place.
- Status: Procurement is organized in 4 lots and contracts are in signing stage.

#### Development of mobile application for the iOS platform

• Purpose: As one of the most common platforms on which mobile devices operate and for which until now has not made necessary application, it is necessary to create a mobile airport application both for this platform and in for easier finding of information by passengers, visitors and all users interested in a particular information. The mobile application is one of the main sources of information for interested users and it was necessary to create the same so that users can reach the requested information as quickly as possible. On the application it will be able to track departures and arrivals, information on how

to get to the airport, where you can buy, and it will be possible to view maps of the airport, obtain information about the airlines, car rental agencies, etc.

iOS platform is one of the most common platform for mobile devices. As till now there were no version of airport mobile application for this platform, it is necessary to is complete this part also with application for iOS platform. Versions of mobile applications for ANDROID and WINDOWS MOBILE are made and therefore it is necessary as soon as possible to complete the mobile application for all platforms.

• Status: Signed Report on selection of the most favorable tender on 30.12.2015.

# 7. DESCRIPTION OF MOST SIGNIFICANT RISKS AND UNCERTAINTIES FOR THE NEXT THREE MONTHS OF THE BUSINESS YEAR

During 2016 it is expected to start regular ground handling of wide-body passenger aircraft, as well as the further growth of charter cargo aircraft handled at our airport, so the realization of procurement of cargo loaders is very important according to the procurement plan for 2016. This increases the capacity and quality of services provided to airlines, that creates conditions for the safer and more regular traffic. In 2016, before the start of the winter timetable the construction and commissioning of the platform for de/anti-icing pad is expected with supporting facilities and installations.

During 2016 is expected further growth of cargo transport, particularly of goods which storage require certain temperature conditions, so it is important to realize construction of another enclosure for goods with temperature regime from +15 ° c to +25 ° c according to the procurement plan for 2016.

Public procurement procedure is in progress for selection of a strategic advisor who will propose to the Government of the Republic of Serbia, as the majority owner of JSC Belgrade Nikola Tesla Airport, an optimal model for future development.

#### Internal risks:

- Saturation of projected airport capacity in terms of number of passengers, commercial content for which demand is growing, as well as parking positions,
- Deterioration of the part of existing infrastructure (part of the maneuvering areas, part of the terminal capacity, part of the primary hot water network, the primary lines of water supply and sewage systems are more than 40 years old)
- Unresolved property relations of the land plots and buildings in the immediate neighbouring environment of the airport, on the locations foreseen for the potential expansion of the airport system.

#### External risks:

- · Growing competition from international airports in neighboring countries,
- Inadequate connection with both the downtown of the City of Belgrade, as well as the broader region of Serbia, having in mind the growth in the number of passengers and introduction of direct flights to the United States.
- The need for continuous improvement of security measures, and consequently increase of the cost,
- The expansion of other airports in Serbia and potential divert of the part of traffic flows, increasing competition at the local level,
- A small number of Tenderers who are licensed for development of technical documentation i.e. construction of facilities for which a building permit is issued by the Ministry (for airports for public air transportation),
- Seasonality and fluctuation in demand, which can be a challenge in planning future capacities.

#### 8. FINANCIAL INSTRUMENTS AND AIMS OF FINANCIAL RISK MANAGEMENT

Due to market risks, which influence on financial instruments, the management of the Company vigilantly monitors risky developments and take precautionary measures for risk management.

#### 8.1. MARKET RISK

When analysing the market and its impact on the Company's operations, primarily on the financial instruments, the Company perceives risks of changes in foreign exchange rates (currency risk) risks of changes in interest rates, and the risk of changes in prices of services.

#### a) Currency risk

The analysis of the assets and resources of the Company on 31.12.2015, primarily of cash and cash equivalents, receivables from buyers, liabilities from long-term loans, financial leasing and the like can be said that the Company is exposed to foreign exchange risk.

By detailed analysis of the currency structure of financial assets and liabilities as of 31.12.2015 can be concluded that the funds are contracted with currency clause and that exceed the agreed financial obligations in the currency. Financial liabilities contracted in currencies are generally long-term nature. Based on the above facts it follows that JSC Belgrade Nikola Tesla Airport does not operate with a high exposure to currency risk.

#### b) Risk of interest rate change

Risk of change of interest rate does not represent significant risk for the Company. Financial instruments with contracted interest are mainly defined with fixed interest rate. Therefore, change of interest rate will not considerably influence revenues and expenditures of the Company

#### 8.2. CREDIT RISK

The Company estimates that the greatest of the risks affecting financial instruments is credit risk. The Company has huge receivables of domestic and foreign buyers and the credit risk permanently exists. In order to diminish this risk, the Company monitors charging realisation on regular basis. It analyses value of collection in the currencies, that is, in contracted terms, delays in payment default and monitoring of outstanding receivables.

#### 8.3. LIQUIDITY RISK AND CASH FLOW

Management of liquidity risk demands special attention of the Management of the Company. Therefore the Management has established business policy mostly based on financing from own resources. Outside funds are mostly long-term resources and short-term obligations can be covered from short-term receivables.

Looking at liquidity indicators we see that the coefficients of the current and quick liquidity are above 3.60, which indicates that the company is able to settle its current and short-term liabilities to maturity from own resources.

Average collection time of receivables is 111 days. It is necessary to give high priority to the collection of due receivables, to provide billing mechanisms with constant monitoring of the balances of receivables and daily updates of billing with the permissible mechanisms as shown by the indicator of turnover coefficient of customers which is 3.3. Average time of settlement of obligations toward suppliers is 48 days, i.e. the Company sattles its current obligations within contracted terms.

# 9. MAJOR ACTIVITIES OF THE COMPANY WITH RELATED PARTIES

JSC Airport Nikola Tesla Belgrade has no related parties on the basis of the Company Law (Official Gazette of RS No.36/2011, 99/2011, 83/2014 and 5/2015 article 62) consequently no business activities with related parties.

#### 9.1. EXISTANCE OF BRANCHES

JSC Belgrade Nikola Tesla Airport does not have branches within the Company.
