The Company financial statements were presented in the form and with the content specified by the provisions of the Rules on the Contents and Form of Financial Statements' Forms submitted by Companies, Cooperatives and Entrepreneurs (RS Official Gazette, No. 95/2014 and 144/2014). These Rules, among other things, laid down the form and content of individual positions in the Balance Sheet, Income Statement, Other Comprehensive Income Report, Cash Flow Statement, Statement of Changes in Equity and Notes to Financial Statements. Pursuant to the above mentioned Rules, amounts in RSD thousands are to be presented in these forms.

Among the legal acts comprising the internal regulations of the Company, in preparation of the financial statements of the Company, the Rules on Accounting and Accounting Policies of the Company, as adopted on November 27, 2015 by the Executive Board of the Company, was used. In addition to the above listed, other internal acts of the Company were used, such as, for example, the Collective Agreement of the Company, regulating employment in the country.

The Law on Capital Market (RS Official Gazette, No. 31/2011, 112/2015 and 108/2016) set down mandatory data to be included in the annual, six monthly and quarterly statements of public companies with securities listed in the regulated markets.

*It should be noted here that in certain cases, not all the relevant provisions of the IFRS or of the Interpretations thereof were taken into account in preparation of the Company financial statements.*

The accounting regulations of the Republic of Serbia, and thus the presented financial statements of the Company, deviate from IFRS in the following aspects:

- Pursuant to the Law on Accounting (RS Official Gazette, No. 62/2013) , the financial statements in the Republic of Serbia for the year 2014 are to be presented in the format stipulated by the Rules on the Contents and Form of the Financial Statements Forms for Companies, Cooperatives and Entrepreneurs (RS Official Gazette, No. 95/2014 and 144/2014), which deviates from the presentation and names of certain general purpose financial statements, as well as from the presentation of certain balance positions stipulated by the Revised IAS 1 – “Presentation of Financial Statements“; and
- Off-balance assets and off-balance liabilities were presented in the Balance Sheet form. According to the IFRS definition, these items are neither assets, nor liabilities.

In addition to the above stated, some deviations were due to the different publishing dates of the Standards and the relevant Interpretations thereof, which are subject to continuous modifications, and the effective dates when these Standards and relevant Interpretations thereof come into force in the Republic of Serbia. Thus, for example, the deviations from the Standards came as the consequence of the fact that the published Standards and relevant Interpretations, which came into force, have not yet been officially translated or adopted in the Republic of Serbia; as the consequence of the fact that the published Standards and relevant Interpretations have not yet come into force; or as the consequence of some other reasons beyond effective control or influence of the Company, with no significant effect on financial position of the Company nor on its business result.

### **Functional currency and currency used for data presentation**

Amounts presented in financial statements are in thousands of Serbian dinar (RSD). The Company uses RSD as the functional and reporting currency. Transactions effectuated in non-functional currencies shall be treated as transactions effectuated in foreign currencies.

**Transactions in foreign currency**, upon initial recognition, are registered in dinar counter value by applying the official middle exchange rate on the translation date.

Pursuant to the provisions of IAS 21 – Changes In Foreign Exchange Rates, monetary items in foreign currency (assets, receivables and liabilities in foreign currency) are recalculated at each balance sheet date by applying the valid exchange rate or the official middle exchange rate at the balance sheet date.

Income/expenses arising on the translation of foreign currency (apart from those related to monetary items as part of net investments of the Company in foreign business, included pursuant to IAS 21) are recognized as revenues or expenses of the Company for the period in which they occurred.

The official middle currency exchange rates of the National Bank of Serbia used for recalculation of monetary assets and liabilities were as follows.

	<i>Amount in RSD</i>			
EUR 1	118.3853	118.4727	123.9679	123.4723
USD 1	96.0842	99.1155	116.1292	117.1353
GBP 1	134.8659	133.4302	145.0256	143.8065

## 5. MANAGEMENT EVALUATION AND JUDGEMENTS

Preparation and presentation of financial statements in compliance with valid legislation of Republic of Serbia, requires that the management of the Company performs assessments, provides judgements and assumptions that are reflected on the reported amounts of assets, liabilities, income and expenses. Although, achieved results may differ from the estimated ones, evaluation and judgements are based on information available as at balance sheet date.

The most important valuations refer to the impairment of financial and non-financial assets and definition of assumptions, necessary for actuarial calculation of long-term compensations to employees based on the retirement bonus.

Within the context of valuation, the business policy of the Company is to disclose information on the **fair value** of assets and liabilities, if the fair value varies significantly from the accounting value. In the Republic of Serbia, a reliable valuation of the fair value of assets and liabilities presents a common problem due to an insufficiently developed financial market, lack of stability and liquidity in sales and purchases of, for example, financial assets and liabilities, and sometimes unavailability of market information. Despite all the above, the Company pays close attention to these problems and its management performs continuous valuations, considering the risks. If it is established that the recoverable (fair or value in use) value of assets in business books of the Company was overstated, the adjustment of value is applied.

## 6. OVERVIEW OF PRINCIPAL ACCOUNTING POLICIES

The basic accounting policies applied in preparation of these financial statements, which were primarily based on the Rulebook on Accounting and Accounting Policies of the Company, are in line with the accounting policies applied in preparation of the financial statements for the year that ended on December 31, 2017, and were applied consistently to all the presented years, unless specified otherwise.

In cases where certain bookkeeping aspects were not regulated clearly by the provisions of the Rulebook on Accounting and Accounting Policies of the Company, the accounting policies based on the currently applicable IFRS were applied.

According to the above mentioned, starting from 01/01/2018 the Company prospectively applies IFRIC Interpretation 22 – Foreign Currency Transactions and Advance Consideration issued by Interpretation Committee for International Financial Reporting Standards – IFRIC, by the end of 2016.

### **Assessment of Fair Value of Buildings**

The fair value of buildings is usually the market value thereof that is established through valuation performed by independent qualified valuers based on market evidence.

In cases where there are no evidence of the fair value of the property in the market, due to the specific nature of the building and because such items are rarely put on sale, the Company performs valuation of fair value of the property by using the income approach or the depreciated replacement cost approach.

The Company in its business books has the registered object - "**Office building Energoprojekt**" carried at revalued amount at the assessment date.

**The Energoprojekt building** was booked at the revalorized value as at March 31, 2018 in the amount of RSD 1,310,863 thousand, i.e, it was performed by reducing the last assessment of the fair value for depreciation accumulated. The ultimate valuation was performed on December 31, 2016 by an external independent qualified valuer by using the comparative method. According to relevant provisions of IAS 16, having in mind that fluctuations of fair value for the mentioned building were insignificant, it was not necessary to appraise its fair value as at December 31, 2017, as well as at Balance Sheet day.

<b>Net effect of deferred tax assets (liabilities)</b>	<b>(152.082)</b>	<b>(152.082)</b>

**Deferred tax assets** are the income tax amounts recoverable in future periods based on *deductible temporary differences*.

A deductible temporary difference is generated in cases where a company's balance sheet contains already disclosed expense on certain bases, which will be recognized from the tax aspect in the following periods. Deferred tax assets are verified on December 31 and are recognized only if it is considered probable that the deferred tax assets will probably be used to reduce a taxable income in the future period.

The amount of deferred tax assets is calculated by multiplying the amount of deductible temporary difference at the end of the year by the Company's corporate income tax rate (15%).

**Deferred tax liabilities** disclosed as at December 31 refer to *taxable temporary differences* between the book value of assets subject to depreciation and their tax base. Due to different provisions used in the Company to define accounting depreciation (in compliance with the IAS/IFRS and other provisions) and provisions that define tax depreciation (in compliance with the Law on Corporate

Income Tax), the Company shall pay higher amount of income tax in the future period than it would pay if the actually disclosed accounting depreciation would be acknowledged by tax legislation. For this reason, the Company recognizes the deferred tax liability, which represents income tax payable once that the Company “recovers” the accounting value of the assets.

The amount of deferred tax liabilities is calculated by multiplying the amount of taxable temporary difference at the end of the year by the Company’s income tax rate (15%).
